

Testing, Evaluation, and Research" (OMB No. 1905-0185) was approved by the Office of Management and Budget (OMB) for three years. OMB stipulated that reports be submitted indicating the work that was conducted under the clearance. Six studies were conducted (or proposed to be conducted). The testing activities included several methods: a focus group, mail questionnaire, telephone questionnaires, and personal interviews. The total number of burden hours that were used in conducting these activities was 126 hours.

The main focus of these efforts was pretesting activities to improve questionnaires. Two activities were undertaken to improve a vehicle fleet survey, and two were used to develop customer satisfaction questionnaires. A methodological study of fuelwood use was conducted. There was a wide variety of uses of the data obtained through the use of this generic clearance.

These projects represent significant strides in our efforts to improve the pretesting of EIA surveys. As we gain more experience, we hope to broaden involvement in testing, evaluation, and research that meet the criteria for the clearance.

II. Current Actions

EIA plans on requesting a 3-year extension of the OMB approval for this collection. For each study that EIA undertakes under this generic clearance, OMB is notified, at least two weeks in advance, and provided with an information copy of the questionnaire (if one is used), and all other materials describing the testing activity.

III. Request for Comments

Comments are invited on:

(a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of EIA's estimate of the burden of the collection of the information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected, and

(d) Ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB

approval of the form. They also will become a matter of public record.
