2. Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

3. Materially alter the budgetary impact of entitlements, grants, user fees, or land programs or the rights and obligations of recipients thereof; or

4. Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This rule was classified "non-significant" under Executive Order 12866 and, therefore, was not reviewed by the Office of Management and Budget.

Paperwork Reduction Act

The information collection requirements of the previously promulgated NSPS under 40 CFR Part 60, Subpart Db were submitted to and approved by the Office of Management and Budget. A copy of this Information Collection Request (ICR) document (OMB control number 2060-0135) may be obtained from Sandy Farmer, Information Policy Branch (PM-223Y); U.S. Environmental Protection Agency; 401 M Street, SW; Washington, DC 20460 or by calling (202) 260-2740. Today's changes to the NSPS do not affect the information collection burden estimates made previously. The information that is required to be collected for this facility specific NO_x standard is the same as for all other affected facilities subject to these NSPS. Therefore, the ICR has not been revised.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The RFA specifically requires the completion of a Regulatory Flexibility Analysis in those instances where small business impacts are possible. Because this rulemaking imposes no adverse economic impacts, a Regulatory Flexibility Analysis has not been prepared.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small business entities.

(s) Facility specific nitrogen oxides standard for Cytec Industries Fortier Plant's C.AOG incinerator located in Westwego, Louisiana:

(1) Definitions.

Oxidation zone is defined as the portion of the C.AOG incinerator that extends from the inlet of the oxidizing zone combustion air to the outlet gas stack.

Reducing zone is defined as the portion of the C.AOG incinerator that extends from the burner section to the inlet of the oxidizing zone combustion air.

Total inlet air is defined as the total amount of air introduced into the C.AOG incinerator for combustion of natural gas and chemical by-product waste and is equal to the sum of the air flow into the reducing zone and the air flow into the oxidation zone.

(2) Standard for nitrogen oxides.

(i) When fossil fuel alone is combusted, the nitrogen oxides emission limit for fossil fuel in § 60.44b(a) applies.

(ii) When natural gas and chemical by-product waste are simultaneously combusted, the nitrogen oxides emission limit is 289 ng/J (0.67 lb/million Btu) and a maximum of 81 percent of the total inlet air provided for combustion shall be provided to the reducing zone of the C.AOG incinerator.

(3) Emission monitoring.

(i) The percent of total inlet air provided to the reducing zone shall be determined at least every 15 minutes by measuring the air flow of all the air entering the reducing zone and the air flow of all the air entering the oxidation

zone, and compliance with the percentage of total inlet air that is provided to the reducing zone shall be determined on a 3-hour average basis.

(ii) The nitrogen oxides emission limit shall be determined by the compliance and performance test methods and procedures for nitrogen oxides in § 60.46b.

(iii) The monitoring of the nitrogen oxides emission limit shall be performed in accordance with § 60.48b.

(4) Reporting and recordkeeping requirements.

(i) The owner or operator of the C.AOG incinerator shall submit a report on any excursions from the limits required by paragraph (a)(2) of this section to the Administrator with the quarterly report required by § 60.49b(i).

(ii) The owner or operator of the C.AOG incinerator shall keep records of the monitoring required by paragraph (a)(3) of this section for a period of 2 years following the date of such record.

(iii) The owner or operator of the C.AOG incinerator shall perform all the applicable reporting and recordkeeping requirements of § 60.49b.

EFFECTIVE DATE: March 29, 1996.

SUPPLEMENTARY INFORMATION

Background

In the rulemaking, EPA reviewed 40 CFR part 110, and removed text which unnecessarily repeats section 311 of the Act. EPA also revised regulatory text: to make it more concise, to conform more

closely to statutory language, or to eliminate text which is legally obsolete. All of these changes were editorial. None effected any changes to the substance of the revised rules. EPA also redesignated affected sections as necessary.

Need for Correction

As published, the final rule contained an incorrect phone number, which could mislead the public and is therefore in need of correction.

Correction of Publication

Accordingly, the publication on February 28, 1996, of the final rule described above, is corrected as follows:

§ 110.6 [Corrected]

Paragraph 1. On page 7421, in the third column, in § 110.6 Notice, in the last line (line nine) of the indented paragraph, the phone number, "202-462-2675," is corrected to read "202-426-2675."

Dated: March 22, 1996.
