Withdrawn Petition

FAP 4H5688. Notice of the petition requested by ISK Biotech Corp., 5966 Heisley Rd., P.O. Box 8000, Mentor, OH 44061-8000 was filed by EPA November 2, 1994 (59 FR 54907). The Notice stated that ISK Biotech Corp. had proposed to amend 40 CFR part 186 by establishing a feed additive regulation to permit the residues of DCPA (Dacthal W75) in or on bean cannery waste, tomato pomace and potato peels. The Agency's Subdivision O Guidelines were revised June, 1994. Bean cannery waste was removed from Table II of that guideline, therefore a feed additive tolerance is no longer required. Tomato pomace is no longer considered to be a significant animal feed, therefore a feed additive tolerance is no longer required. The need for feed additive tolerances on processed potato waste is based on the maximum concentration factor observed for residues in or on wet peel. Concentration was only observed in the dry peel fraction, therefore a feed additive tolerance for dried potato waste is not required. The Agency has withdrawn the subject FAP.
