Discussion

The current version of AC25-7, as modified by Change 1 on June 6, 1996, provides guidance only for the flight testing necessary to show compliance with the airplane performance and handling characteristics requirements of Subpart B of part 25; flight test guidance for showing compliance with other part 25 regulatory requirements remains in FAA Order 8110.8, "Engineering Flight Test Guide for Transport Category Airplanes."

Considerable changes in technology have occurred since AC25-7 was issued and Order 8110.8 was last revised (1974). The FAA has established new and revised guidance and policy material during this time period to keep pace with these changes in technology, and also to improve certification practices based on service history information. The proposed revision to AC25-7 updates the existing Subpart B guidance by incorporating this new and revised material. Similarly, the guidance material currently contained in Order 8110.8 is updated to reflect certification standards and flight test methods for

⁸ 17 CFR 200.30-3(a)(12) (1995).
