The purpose of the meeting is to review the Agency's draft technical guidance document on Lake and Reservoir Bioassessment and Biocriteria. The document describes a set of protocols for biological assessment/monitoring to assess the total ecological health of lakes and reservoirs. The technical guidance is the second in a series of guidance documents being developed to assist states to develop biocriteria, numeric values or narrative expressions that measure attainment of biological integrity of aquatic communities inhabiting waters that have been given a designated aquatic life use; in 1994, a subcommittee of EPEC reviewed draft guidance on biocriteria for streams and small rivers. The charge to the Lakes Biocriteria Subcommittee is to review for scientific adequacy and pertinence: (1) The selection and treatment of biotic parameters used to evaluate lake and reservoir resource quality; (2) the selection and treatment of habitat characteristics used to classify and to assess lakes and reservoirs; (3) recommended sampling design; and (4) techniques to determine significant deviations from the criteria.

Single copies of the review materials provided to the Subcommittee can be obtained by contacting Chris Faulker, Assessment and Watershed Protection Division (4503F), EPA Office of Water, 401 M Street, SW., Washington, DC 20460, telephone (202) 260-6228. Background:

In a letter dated October 25, 1995, to Dr. Matanoski, Chair of the SAB Executive Committee, Deputy Administrator Fred Hansen charged the SAB to update its 1990 report, *Reducing Risk: Setting Priorities and Strategies for Environmental Protection*. Specifically, the charge is to: (1) Develop an updated ranking of the relative risk of different environmental problems based upon explicit scientific criteria; (2) provide an assessment of techniques and criteria that could be used to discriminate among emerging environmental risks and identify those that merit serious, near-term Agency attention; (3) assess the potential for risk reduction and propose alternative technical risk reduction strategies for the
