

in capital markets. As noted above, CIG does not believe the market will accept this rate level, and considers it inappropriate to place the full indicated increase into effect subject to refund. Accordingly, while not modifying any of its underlying positions on specific issues, CIG has voluntarily waived implementation of 12.5 percent of the total reservation-rate level as to Rate Schedules TF-1 and TF-2, and has adjusted the Rate Schedule TI-1 rate to be consistent with the resulting Rate Schedule TF-1 level.

CIG states that the tariff sheets listed in Appendix A to the filing include the creation of two new transportation services and the substantial modification of its two "no-notice" delivery services, as well as multiple conforming tariff modifications. Further, CIG states, the tariff sheets provide for a tracking provision to flow through to CIG's former jurisdictional sales customers the benefit of the "Mesa Settlement Surcharge," as further explained in the filing. Last, CIG states that the tariff sheets include the necessary authority to implement the Commission's policy on negotiated rates, pursuant to the policy statement issued January 31, 1996 in Docket No. RM95-6.

CIG states that a full copy or abbreviated copy of its filing are being served on all jurisdictional customers, applicable state commissions and interested parties that have requested service.

Columbia Gulf Transmission Company; Notice of Filing

April 3, 1996.

Take notice that on March 29, 1996, Columbia Gulf Transmission Company (Columbia Gulf) tendered for filing with the Federal Energy Regulatory Commission, Twelfth Revised Sheet No. 018 and Twelfth Revised Sheet No. 019, to be effective April 1, 1996.

Columbia Gulf states that the purpose of the instant filing is to correct an inadvertent mathematical error in the calculation of the fuel retainage factors for Columbia Gulf's mainline zone, which was calculated and reflected at 3.232% in Columbia Gulf's March 1, 1996 filing in Docket No. TM96-4-70. The total mainline quantities used in the calculation of the mainline retainage percentage for the projected period were incorrectly overstated by 1 MMDth. This filing corrects the error by changing the percentage to 3.063%. Also enclosed is Appendix A to the filing that supports the correct calculation. The unrecovered component of the retainage factor is not being adjusted in the instant filing. The offshore and onshore laterals remain unaffected by this error.

Columbia Gulf is serving copies of the instant filing on its customers and affected State Commissions.

Any person desiring to be heard or to protest the filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.214 and Section 385.211 of the Commission's Rules and Regulations.
