

program that, as proposed and approved in concept, would require market participants to make numerous systems changes. Thus, the requisite systems changes to report time of trade is one element of the on-going initiative, about which participants have been on notice for more than a year. Time of trade will not only be useful in market surveillance efforts for the present phase of the pilot program, but time of trade will continue to be needed when retail trade reports are required. Moreover, the MSRB has proposed, and the Commission is approving, a delayed effective date so that dealers may attempt to merge these systems enhancements with any others that may be required internally by dealers.

Finally, while the Commission has not yet formally reviewed or approved the MSRB's proposal to delay institutional trade reporting until that phase can be merged with customer trade reporting, the Commission believes that market surveillance efforts and transparency are both essential elements of the overall pilot program and, therefore, one aspect of the program should not be delayed because technical difficulties have slowed progress in another aspect of the program. In this regard, the Commission looks forward to working with the MSRB and market participants toward continued swift improvements in both market surveillance and price transparency in the municipal securities markets.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,¹⁶ that the proposed rule change (SR-MSRB-95-17), effective July 1, 1996, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹⁷

Margaret H. McFarland,

Deputy Secretary.
