Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by letter dated March 5, 1996, Mr. C. Morris submitted a Petition pursuant to 10 CFR 2.206 requesting that the U.S. Nuclear Regulatory Commission (NRC) take action with regard to all nuclear power plants.

The Petitioner requests that, within 90 days, the operating licenses of all nuclear power plants be suspended until such time as those licensees have discovered the reasons for the repeated errors in their electrical distribution system designs and in their undervoltage relay (UVR) set points, and provided convincing evidence that these deficiencies have been corrected. Since the Petitioner asserts that the situation is urgent, the request is being treated as one for immediate relief. The Petitioner also requests that the aforementioned evidence be submitted for review by a competent third party, and that if the NRC finds that licensees may safely operate with UVRs that do not remain properly set, it should do so in the context of a public meeting.

The Petition is being treated pursuant to 10 CFR 2.206 of the Commission's regulations and has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken
