

consumption, regular driving routes, and centralized operation, state and municipal vehicle fleets have been identified as attractive candidates for demonstration of the use of alternate fuels. With the assistance of the Idaho Operations Office, the Office of Technology Utilization has the opportunity to introduce an alternative fuel program through state energy offices.

The U.S. Department of Energy (DOE) invites applications to demonstrate alternative fuel vehicles from each of the state energy offices in the 50 states, the District of Columbia, the U.S. Virgin Islands, the Commonwealth of Puerto Rico and any territory or possession of the United States. These entities are under no obligation to apply. Only one proposal will be accepted by DOE from each of the 50 states, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and any territories or possessions of the United States.

Interested state agencies, municipalities, local school districts, and other local agencies must contact their state energy office for applications for subawards, and must submit their proposals to their energy office to be considered.

Restriction of eligibility to propose under this program is considered necessary to achieve program objectives and is made in accordance with 10 CFR 600.6.

It is anticipated that the DOE will make multiple financial assistance awards as a result of this solicitation. In fiscal year 1996, approximately \$1,500,000 has been allocated to the program. Currently \$975,000 is available to award and it is expected that additional funding of as much as \$600,000 will be made available this fiscal year.

It is anticipated that approximately eight to twelve awards will be made with funding levels not to exceed \$150,000 for any individual award.
