Notice of Availability of Draft Regulatory Guide and Public Meeting

SUMMARY: The NRC is announcing the availability for public comment of Draft Regulatory Guide DG-1046, "Guidelines for Reporting Reliability and Availability Information for Risk-Significant Systems and Equipment in Nuclear Power Plants."

The NRC is also announcing a public meeting on June 4, 1996, to discuss both Draft Regulatory Guide DG-1046 and a proposed regulation, "Reporting Reliability and Availability Information for Risk-Significant Systems and Equipment," Section 50.76, which is proposed for 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities." The agenda for the meeting appears in the Supplementary Information Section.

DATES: Comments regarding any aspect of the draft regulatory guide are due to the NRC by July 5, 1996. Comments received after that date will be considered if it is practicable to do so, but the NRC can give no assurance of consideration for late comments. Comments on the proposed rule, Section 50.76, are due by June 11, 1996.

The public meeting is scheduled for Tuesday, June 4, 1996, from 8:30 AM to 5:00 PM in the auditorium of NRC's headquarters at Two White Flint North, 11545 Rockville Pike, Rockville, Maryland. Comments on the proposed rule and the draft regulatory guide may be presented at the public meeting.

ADDRESSES: Mail written comments to Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Copies of DG-1046, the proposed rule Section 50.76, and all comments received may be examined or copied for a fee at the NRC Public Document Room, 2120 L Street NW., Washington, DC.

A free single copy of DG-1046 may be requested by writing to the Distribution and Mail Services Section, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by fax to (301) 415-2260.

FOR FURTHER INFORMATION CONTACT: Dennis Allison, Office for Analysis and Evaluation of Operational Data, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone (301) 415-6835, e-mail DPA@NRC.GOV.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission has issued for public comment a draft of a guide planned for its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses. Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

Draft Regulatory Guide DG-1046

The draft guide, temporarily identified by its task number, DG-1046 (which should be mentioned in all correspondence concerning this draft guide), is titled "Guidelines for Reporting Reliability and Availability Information for Risk-Significant Systems and Equipment in Nuclear Power Plants." The guide will be in Division 1, "Power Reactors." This regulatory guide is being developed to provide guidance on methods acceptable to the NRC staff for meeting the requirements of a proposed regulation, Section 50.76, which was published for public comment in the Federal Register on February 12, 1996 (61 FR 5318). Section 50.76 would require that licensees for commercial nuclear power reactors report plant-specific summaries of reliability and availability data for selected systems and equipment to the NRC. It would also require that records and documentation of each occurrence of a demand, failure, or unavailable period that provides the basis for the summary data that was reported to the NRC be maintained on site and be made available for NRC inspection.

The draft guide has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Comments may be submitted as proposed modified text for the regulatory guide that incorporates the comments, or as discussions of examples of particular recordkeeping methods, equipment operation, or reportable events that illustrate a particular point regarding collecting and submitting the summary data. To assist

efficient and complete comment resolution, commenters are requested to reference the numbered sections in DG-1046 (for example, Regulatory Position 1.1), with page numbers related to their comments as appropriate.

Electronic Submittal of Comments

Comments also may be submitted electronically, in either ASCII text or Wordperfect format (version 5.1 or later), by calling the NRC Electronic Bulletin Board on FedWorld. The bulletin board may be accessed using a personal computer, a modem, and one of the commonly available communications software packages, or directly via Internet.

If using a personal computer and modem, the NRC subsystem on FedWorld can be accessed directly by dialing the toll free number: 1-800-303-9672. Communication software parameters should be set as follows: parity to none, data bits to 8, and stop bits to 1 (N,8,1). Using ANSI or VT-100 terminal emulation, the NRC NUREGs and RegGuides for Comment subsystem can then be accessed by selecting the "Rules Menu" option from the "NRC Main Menu." For further information about options available for NRC at FedWorld, consult the "Help/Information Center" from the "NRC Main Menu." Users will find the "FedWorld Online User's Guides" particularly helpful. Many NRC subsystems and data bases also have a "Help/Information Center" option that is tailored to the particular subsystem.

The NRC subsystem on FedWorld can also be accessed by a direct dial phone number for the main FedWorld BBS, 703-321-3339, or by using Telnet via Internet, fedworld.gov. If using 703-321-3339 to contact FedWorld, the NRC subsystem will be accessed from the main FedWorld menu by selecting the "Regulatory, Government Administration and State Systems," then selecting "Regulatory Information Mall." At that point, a menu will be displayed that has an option "U.S. Nuclear Regulatory Commission" that will take you to the NRC Online main menu. The NRC Online area also can be accessed directly by typing "/go nrc" at a FedWorld command line. If you access NRC from FedWorld's main menu, you may return to FedWorld by selecting the "Return to FedWorld" option from the NRC Online Main Menu. However, if you access NRC at FedWorld by using NRC's toll-free number, you will have full access to all NRC systems but you will not have access to the main FedWorld system.

If you contact FedWorld using Telnet, you will see the NRC area and menus,

including the Rules menu. Although you will be able to download documents and leave messages, you will not be able to write comments or upload files (comments). If you contact FedWorld using FTP, all files can be accessed and downloaded but uploads are not allowed; all you will see is a list of files without descriptions (normal Gopher look). An index file listing all files within a subdirectory, with descriptions, is included. There is a 15-minute time limit for FTP access.

Although FedWorld can be accessed through the World Wide Web, like FTP that mode only provides access for downloading files and does not display the NRC Rules menu.

For more information on NRC bulletin boards call Mr. Arthur Davis, Systems Integration and Development Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415-5780; e-mail AXD3@nrc.gov.

Participation and Comments at Public meeting

Interested individuals may attend the public meeting and address relevant remarks or comments to the NRC staff at the meeting. To facilitate the scheduling of available time for speakers and orderly conduct of the meeting, members of the public who wish to speak at the meeting should request the opportunity to speak in advance of the meeting.

To request the opportunity to speak at the public meeting, contact the cognizant NRC staff member listed in the For Further Information Contact section. Indicate as specifically as possible the topic of your comment. Provide your name, telephone number, and possibly e-mail address at which you can be reached, if necessary, before the meeting. Registration will be available at the meeting for a limited number of additional speakers on a first-come basis.

The agenda for the public meeting on June 4, 1996, to discuss reporting reliability and availability information for risk-significant systems and equipment in nuclear power plants follows.

8:30 AM Introductory Remarks
 9:00 AM Need and Uses of Reliability and Availability Data and Description of Proposed Rule
 10:00 AM Public Comments and Statements
 10:30 AM Overview of Draft Regulatory Guide DG-1046
 11:00 AM Reliability/Availability Data Pilot Study
 12:00 Noon Lunch
 1:00 PM Discussion of Draft Regulatory Guide DG-1046

3:30 PM Public Comments and Statements

4:00 PM Implementation
 5:00 PM Adjourn

In allocating discussion time at the meeting, priority will be given to major issues. Other matters will also be discussed if time permits.
