NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission, new, revision, or extension: Revision.
2. The title of the information collection: NRC Form 241, "Report of Proposed Activities in Non-Agreement States."
3. The form number if applicable: NRC Form 241.
4. How often the collection is required: NRC Form 241 must be submitted each time an Agreement State licensee wants to engage in or revise its activities involving the use of radioactive byproduct material in a non-Agreement State. The NRC may waive the requirements for filing additional copies of NRC Form 241 during the remainder of the calendar year following receipt of the initial form from a person engaging in activities under the general license.
5. Who will be required or asked to report: Any persons who hold a specific license from an Agreement State and want to conduct the same activity in non-Agreement States under the general license in 10 CFR 150.20.
6. An estimate of the number of responses: The NRC annually receives approximately 4,600 responses from Agreement States associated with NRC Form 241. These responses include 200 initial reciprocity requests on NRC Form 241, and 1,100 revisions and 3,300 clarifications of the information submitted on the forms.
7. The estimated number of annual respondents: 200 Agreement State licensees.
8. An estimate of the total number of hours needed annually to complete the requirement or request: 1,200 hours (16 minutes per response)

9. An indication of whether section 3507(d), Pub. L. 104-13 applies: Not applicable.

10. Abstract: Under the reciprocity provisions of 10 CFR part 150, any Agreement State licensee who engages in activities (use of radioactive byproduct material) in non-Agreement States under the general license in section 150.20 is required to file 4 copies of NRC Form 241, "Report of Proposed Activities in Non-Agreement States," and 4 copies of its Agreement State license at least 3 days before engaging in each such activity. This mandatory notification permits NRC to schedule inspections of the activities to determine whether the activities are being conducted in accordance with requirements for protection of the public health and safety.

**Agency Information Collection
Activities: Submission for Office of

Review; Comment Request**

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission: Revision.
2. The title of the information collection: NRC Form 313, "Application for Material License."
3. The form number: NRC Form 313.
4. How often the collection is required: There is a one-time submittal of information to receive a license. Once a specific license has been issued, there is a 5-year resubmittal of the information for renewal of the license.
5. Who will be required or asked to report: All applicants requesting a license for byproduct or source material.
6. An estimate of the number of responses: 2,669 licensing actions for NRC licensees and 6,922 licensing actions for Agreement State licensees. The NRC has published a final rule, "One-Time Extension of Certain Byproduct, Source, and Special Nuclear Materials Licenses" on January 16, 1996, with an effective date of February 15, 1996. This rule implements, on a one-time basis, a 5-year extension of certain byproduct, source, and special nuclear materials licenses. It is expected that approximately 80 percent of NRC licenses will qualify for the one time extension. An 80 percent reduction in the number of anticipated renewals during the OMB clearance period was used in calculating the burdens.
7. The estimated number of annual respondents: Approximately 6,200 NRC licensees and 12,400 Agreement State licensees. This is the total number of licensees which could potentially submit licensing actions.
8. An estimate of the total number of hours needed annually to complete the requirement or request: 18,683 hours for NRC licensees and 48,454 hours for Agreement State licensees (7 hours per response).

9. An indication of whether Section 3507(d), Pub. L. 104-13 applies: Not applicable.

10. Abstract: Applicants must submit NRC Form 313 to obtain a specific license to possess, use, or distribute byproduct or source material. The information is reviewed by the NRC to determine whether the applicant is qualified by training and experience, and has equipment, facilities, and procedures which are adequate to protect the public health and safety of the public, and minimize danger to life or property.

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission: Revision.
2. The title of the information collection: 10 CFR Part 31, "General Domestic Licenses for Byproduct Material"
3. The form number: Not applicable.
4. How often the collection is required: Reports are submitted as events occur. Registration certificates may be submitted at any time. Changes to the information on the registration certificate are submitted as they occur.
5. Who will be required or asked to report: Persons receiving, possessing, using, or transferring byproduct material in certain items.
6. An estimate of the number of responses: 170 reports from NRC licensees and 340 reports from Agreement State licensees.
7. The estimated number of annual respondents: Approximately 10,126 NRC general licensees and 20,252 Agreement State general licensees.
8. An estimate of the total number of hours needed annually to complete the requirement or request: 2,634 hours for NRC licensees and 5,265 hours for Agreement State licensees.
9. An indication of whether Section 3507(d), Public Law 104-13 applies: Not applicable.
10. Abstract: 10 CFR Part 31 establishes general licenses for the possession and use of byproduct material in certain items and a general license for ownership of byproduct material. General licensees are required to keep records and submit reports identified in Part 31 in order for NRC to determine with reasonable assurance that devices are operated safely and without radiological hazard to users or the public. The revision reflects an overall increase in burden. There has been a decrease in burden for NRC licensees, due to a smaller number of general licensees and fewer reports being filed by general licensees. However, the burden for Agreement State licensees was not included in the previous burden.
