SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060-0096.

Title: Application for Ship Radio Station License.

Form No.: FCC 506.

Type of Review: Revision to an existing collection.

Respondents: Individuals or households; Businesses or other for-profit; State, Local or Tribal Government; Non-profit institutions.

Number of Respondents: 106,192.

Estimated Time Per Response: 22 minutes.

Total Annual Burden: 38,653 hours.

Estimated Cost Per Respondent: There is a combined filing and regulatory fee of \$75 for a new or renewed license and a \$45 filing fee for an application requesting modification.

Needs and Uses: FCC Rules require that applicants file the FCC 506 to apply for a new or modified ship radio station license. The form can also be used to renew a station license. The FCC 506A is used by the applicant as a temporary operating authority until the ship radio station license is received.

This form is required by the Communications Act of 1934, as amended; International Treaties and FCC Rules 47 CFR Parts 1.922, 1.925 and 80.19.

Editorial changes will be made to the instructions to include the mailing location for feeable applications and the addition of the toll free 800 number for the Consumer Assistance Branch in Gettysburg, PA. Item 24 of FCC 506 will be revised to collect the length of ship in meters in lieu of feet. Item 27 will be deleted and the drug certification made part of the certification text. These revisions will not increase the burden time for application completion.

OMB Approval Number: 3060-0564.

Title: 47 CFR 76.924 Cost accounting and cost allocation requirements.

Type of Review: Revision to an existing collection.

Respondents: Businesses or other for-profit.

Number of Respondents: 13,500.

Total Annual Burden: 4–40 hours.

72,000 total annual hours. We estimate that an additional 500 community units each year will be obligated to meet the 76.924 requirements for the first time. We estimate the one-time average burden for these respondents to rearrange accounting records is 40 hours. 500 community units x 40 hours each = 20,000 hours. The Commission estimates the burden to the existing population of regulated community units to comply with the modified requirements set forth in 76.924 will be an average of 4 hours per community unit. Currently, we estimate cable operators provide service in approximately 13,000 community units that are subject to rate regulation. 13,000 existing community units x 4 hours per community units = 52,000 hours.

Costs to Respondents: None.

Generally, cable operators use computers and accounting records and software as part of customary and usual business practices. This information collection does not require the purchase of anything additional. It only rearranges records that already exist.

Needs and Uses: Section 623 of the Communications Act of 1934, as amended by the Cable Television Consumer Protection and Competition Act of 1992 ("1992 Cable Act"), requires the Commission to prescribe rules and regulations for determining reasonable rates for basic tier cable service and to establish criteria for identifying unreasonable rates for cable programming services and associated equipment. Subsequently, on April 1, 1993, the Commission adopted a Report and Order and Further Notice of Proposed Rulemaking, FCC 93–177, MM Docket 92–266, in which cost accounting and cost allocation requirements for regulated cable operators were specified. These requirements were set forth in 47 CFR 76.924 and were adopted on an interim basis. Then, on December 15, 1995, the Commission adopted a Second Report and Order, First Report on Reconsideration, and Further Notice of Proposed Rulemaking, FCC 95–502, MM Docket 93–215 and CS Docket 94–28, in which requirements for cable operators for allocating to service cost categories, as set forth in 76.924(e), were modified and adopted on a permanent basis.

76.924(e) now permits cable operators to allocate service costs to three service cost categories, instead of up to seven service cost categories. The third service

cost category will simply serve as an "all other" service costs category that captures what operators previously had to allocate to multiple categories. Cost accounting and cost allocation requirements standardize the methodology in which cable operators report financial data. The Commission's system of cable rate regulation imposes a price cap on cable service rates with certain categories of costs defined as external to the cap. The cost accounting and cost allocation requirements are necessary in order to assure that costs that are intended to receive external treatment are in fact accorded such treatment. Cost accounting and cost allocation requirements are used by cable operators wishing to justify rates higher than their capped levels via a cost-of-service filing; and the requirements are necessary to permit accurate identification of such costs that will justify rates above the cap.
