

educational programs, as well as the opportunity for interagency training and academic research within Skagway. Specialized historic-restoration skills would be made available to others on a cost-reimbursable basis. Access to the Dyea area would be improved with a rerouted, wider gravel road, and parking, picnic, interpretive, and trail opportunities. Selected Dyea townsite streets would be cleared and signed. Archaeological inventory, surveys, and mapping; marking the historical segments; minor trail rerouting; and increased interpretive programs would occur along the Chilkoot Trail. White Pass archaeological inventory, surveying, mapping, and marking the historic trail route would be completed; but no facilities are proposed in the unit.

In Seattle, the proposed action would lead eventually to acquiring a permanent location for the park visitor center, park offices, and historic collections. In the interim, expanded lease space at the present location would allow park offices to move to accessible space on the third floor; and park collections would be moved to the mezzanine level of the building. The interpretive focus would shift with more emphasis toward the role of the Pacific Northwest in the gold rush. Additional interpretive information (exhibits and walking tours) would be developed within the Pioneer Square area. Interpretive exhibits, in cooperation with the city of Seattle, would be added to the waterfront area at Washington Street Landing. Contacts with the Skagway office would be expanded with staff cross training. A Friends of the Park group would be organized.

Under the No-Action Alternative (alternative A), the development of a new general management plan would not take place. Management actions would react to situations as needed. In Alaska, work toward a new crossing of Nelson Slough and beach area access would continue, and the existing park management and operations would continue. In Seattle, the basic operation would continue unchanged.

Under alternative B (minimal alternative), some actions would take place in the park units. In Alaska, the park boundary in Dyea would be marked. Work toward a new crossing of Nelson Slough and beach area access would continue. The existing road along Nelson Slough would be graveled, but remain one lane. The campground, picnic area, and ranger station would be moved to be within the park boundary and the historic segments of the Chilkoot Trail would be marked. In Skagway interpretive programs would

be slightly increased, as would the visitor center operation. Site bulletins would be developed for each restored building. There would be an increased emphasis on maintaining the restored historic buildings as that program is completed. In Seattle about 2,800 ft² of additional lease space would be acquired and improvements would be made to storage capabilities and the mezzanine area. Collections would be moved out of the basement and minor improvements made to existing exhibits. Pioneer Square and Washington Street Landing and other appropriate waterfront locations interpretive exhibits would be developed and sited. A park friends group would be established.

Under alternative D for Alaska, park management, development, resource protection, and maintenance needs would expand to meet all of the expected visitor use increases and interests in the park well into the next century. To accommodate the additional visitor use, there would be an increase in operational activities, maintenance, interpretation, and resources management, while protecting park resources from degradation. Park facilities would be upgraded with improvements to the visitor and administrative facilities in Skagway and the development of new facilities in Dyea and along the Chilkoot Trail. The day-use education center proposed in Alternative C would be expanded to provide for overnight use. This would provide visitors with additional activity options for a better understanding of park themes. Additional historic buildings would be acquired for restoration and lease for commercial activities, or retention for administrative purposes. Both an historical restoration center and a Klondike History Research Center would be established in Skagway.

The park would work with the state of Alaska and city of Skagway to provide better access for the Dyea and Chilkoot Trail areas. The park would also initiate and maintain additional cooperation with the city of Skagway, Parks Canada, and state and federal land management agencies to assure compatible uses in areas adjacent to the park. Maximum protection of cultural and natural resources would be provided. Connections with the Brackett Wagon Road and Canadian trails would be examined, as would additional trail opportunities along the Chilkoot Trail.

No alternative D (Substantial Change) was developed for Seattle unit.

This document is a collaborative effort between two vastly separated National Park system support offices

and two park locations along with input from the city of Skagway, state of Alaska, and international assistance from Parks Canada.

Dated: May 16, 1996.

Judith Gottlieb,

Field Director, Alaska.
