The NTP Board of Scientific Counselors provides scientific oversight, advising the NTP Director and the NTP Executive Committee on scientific content and evaluating the scientific merit and overall quality of NTP science. The members (listed in the 1995 Annual Plan) are appointed by the Secretary, DHHS.

Scientific activities are divided into several major program areas: carcinogenesis; genetic toxicology; mechanism-based toxicology; alternative methods; and toxicology. The latter area covers activities in immunologic, neurobehavioral, and respiratory toxicologies, as well as reproductive and developmental toxicology. There are special projects on studying toxicities of AIDS therapeutics and toxicity of Superfund chemicals. Program and project leaders, along with addresses and telephone numbers, are identified in the 1995 Annual Plan.

The chemical nomination and selection process is integral to the effective long-term operation of the NTP with respect to toxicological studies of chemicals using modern techniques and to the development and validation of new assay methods. Thus, the NTP welcomes nominations of chemicals for study from everyone. At a minimum, the nominator should give the name of the chemical or substance, the rationale for the nomination, and recommend the type study(s) to be considered. In addition, it is desirable, but not essential, to supplement each nomination with the following information, if known:

- Chemical and physical properties.
- Production, use, occurrence, and analysis data.
- Toxicology information.
- Chemical disposition and structure-activity relationships.
- Planned or ongoing or recently completed toxicological and environmental studies.

To receive the NTP Annual Plan for Fiscal Year 1995, and the FY 1995 Review of Current DHHS, DOE, and EPA Research Related to Toxicology, please write or telephone the NTP Central Data Management, P.O. Box 12233, MD E1-02, Research Triangle Park, N.C. 27709, (telephone 919/541-3419).
