DEPARTMENT OF THE INTERIOR

Office of the Assistant Secretary; Water and Science

Central Utah Project Completion Act; Wasatch County Water Efficiency Project and Daniel Replacement Project

AGENCIES: The Department of the Interior (Department); the Utah Reclamation Mitigation and Conservation Commission (Commission); and the Central Utah Water Conservancy District (District).

ACTION: Notice of availability of the Draft Environmental Impact Statement (DEIS):

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department, Commission, and the District have issued a joint Draft Environmental Impact Statement (DEIS) for the Wasatch County Water Efficiency Project and Daniel Replacement Project (WCWEP & DRP). The DEIS analyzes alternatives and impacts associated with efficiency improvements in the management, delivery, and treatment of water in Wasatch County. The project includes the conversion of some open irrigation systems to pressurized pipeline systems, thus conserving water and making sprinkler irrigation possible. Conserved water would be provided to the Daniel Irrigation Company as a replacement supply for the terminated transbasin diversions from the Strawberry River, located in the Colorado River Basin. With the termination of the diversions from the Strawberry River, natural stream flows would be re-established in the upper Strawberry River, thus completing a major mitigation commitment associated with the Strawberry Aqueduct and Collection System of the Bonneville Unit. Colorado River Storage Project power would be used, as part of the WCWEP & DRP project, to conserve water, improve efficiencies, and provide a replacement water supply.

Public participation has occurred throughout the EIS process. A Notice of Intent was filed in the Federal Register in December 1992. Since that time, open houses, public meetings, and mail-outs have been conducted to solicit comments and ideas. Any comments
