

Strategic Environmental Research and Development Program (SERDP), Scientific Advisory Board (SAB)

ACTION: Notice.

In accordance with Title 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), announcement is made of the following Committee meeting:

Date of Meeting: July 9, 1996 from 0800 to approximately 1735, July 10, 1996 from 0800 to approximately 1730, and July 11, 1996 from 0800 to approximately 1240.

Place: Federal Highway Administration Conference Room, 901 N. Stuart Street, Ste. 304, Arlington, VA.

Matters to be Considered: Research and Development Proposals and continuing projects requesting Strategic Environmental Research and Development Programs funds in excess of \$1M will be reviewed.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the Scientific Advisory Board at the time and in the manner permitted by the Board.

For Further Information Contact: Ms. Kimberly Kay, Labat-Anderson Incorporated, 8000 Westpark Drive, McLean, Virginia 22102 or telephone 703-506-1400, extension 552.

Dated: June 7, 1996.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000-04-M

Department of the Army

Environmental Assessment and Finding of No Significant Impact for the Realignment of Towed and Self-Propelled Combat Vehicle Mission From Letterkenny Army Depot, Pennsylvania; the Associated Combat Vehicle Material and Management Functions From the Defense Distribution Depot Letterkenny, Pennsylvania (DDLDP); and the 142nd Explosive Ordnance Detachment From McClellan, Alabama to Anniston Army Depot (ANAD), Alabama

AGENCY: Department of the Army, DOD.

ACTION: Notice of availability.

SUMMARY: In accordance with Public Law 101-510 (as amended), the Defense Base Closure and Realignment Act of 1990, the Defense Base Closure and Realignment Commission recommended the realignment of the towed and self-propelled combat vehicle mission from Letterkenny Army Depot (LEAD), Pennsylvania, to Anniston Army Depot (ANAD), Alabama, and the combat vehicle material and management

functions from the Defense Distribution Depot Letterkenny (DDLDP) Pennsylvania, to Defense Distribution Depot Anniston, Alabama (DDAA). The Army also proposes to relocate the 142nd Explosive Ordnance Detachment (EOD) from Fort McClellan, Alabama, to ANAD, pursuant to another of the Commission's recommendations.

The Environmental Assessment (EA) evaluates the environmental impacts associated with the transfer of 154 civilian positions from DDLDP to DDAA and 17 military positions from Fort McClellan to ANAD. The reallocation of the combat vehicle mission to ANAD involves only the transfer of workload. No additional jobs will transfer because there are adequate personnel at ANAD available to perform the additional workload. It also involves the construction of a new transmission dynamometer facility, a new machining facility, a new operations facility for EOD personnel use, expansion of the recoil repair room, renovation of the recoil honing facility, and upgrade of the firing range. Three parcels of land totaling 137 acres within the Nichols Industrial Complex would be used for storage of combat vehicles before and after maintenance work.

The EA, which is incorporated into the Finding of No Significant Impact, examines potential impacts of the proposed action and alternatives on 13 resource areas and areas of environmental concern: land use, air quality, noise, water resources, geology, infrastructure, training areas, hazardous and toxic materials, biological resources and ecosystems, cultural resources, the sociological environment, economic development, and quality of life.

Based on the analysis found in the EA, which is hereby incorporated in this Finding of No Significant Impact, it has been determined that the implementation of these realignments at ANAD would have no significant or cumulatively significant impacts on the quality of the natural or human environment. Because no significant environmental impacts would result from implementation of the proposed action, an Environmental Impact Statement is not required and will not be prepared.

DATES: Inquiries will be accepted until July 1, 1996.

ADDRESSES: Copies of the Environmental Assessment and Finding of No Significant Impact can be obtained by contacting Dr. Neil Robison at the U.S. Army Corps of Engineers, Mobile District, ATTN: CESAM-PD-E,

P.O. Box 2288, Mobile, Alabama 36628-0001 or by telephone at (334) 690-3018.

Raymond J. Fatz,

Acting Deputy Assistant Secretary of the Army (Environmental, Safety and Occupational Health) OASA (IL&E).

BILLING CODE 3710-08-M

Intent To Prepare an Environmental Impact Statement (EIS) for: Headquarters, U.S. Army Field Artillery Center and Fort Sill, Fort Sill, OK

AGENCY: U.S. Army, Fort Sill, OK.

ACTION: Notice of intent.

SUMMARY: The purpose of this project is to identify and evaluate the environmental impacts associated with implementation of the Real Property Master Plan (RPMP) for the U.S. Army Field Artillery Center and Fort Sill (USAFACFS).

FOR FURTHER INFORMATION CONTACT:

Written comments may be forwarded to U.S. Army Corps of Engineers, ATTN: CESWT-PL-R (J. Randolph), P.O. Box 61, Tulsa, Oklahoma 74121-0061.

SUPPLEMENTARY INFORMATION: The most recent environmental documentation prepared under the guidelines set forth by the National Environmental Policy (NEPA) for Fort Sill activities, including the Master Plan, was the Fort Sill Ongoing Mission EIS completed in September 1978. Since then several changes in legislation, program activities, and missions have occurred. The Fort Sill Master Plan, now referred to as the Fort Sill Real Property Master Plan (RPMP), has become increasingly complex and diverse. Based upon this complexity and diversity of the RPMP, the nature of the activities conducted in the implementation of the RPMP, and its potential to have significant impacts on certain natural, economic, social, and cultural resources of the Fort Sill community, it has been determined that an EIS should be prepared for the RPMP. The study area for environmental concerns will be the entire Fort Sill installation. The objective is to provide a comprehensive and programmatic EIS which is a complete, objective appraisal of the environmental impact of the installation's RPMP. The purpose of the RPMP EIS is to serve as a planning document for managing activities at the installation by the commanders, Installation Planning Board, Master Planning Office, Directorate of Environmental Quality, and others; a source of public information, and as a reference for mitigation tracking.
