Title: Section 73.1820 Station Log.
Form No.: N/A.
Type of Review: Extension of a currently approved collection.
Respondents: Businesses or other for-profit; not-for-profit institutions.
Number of Respondents: 13,519.

Needs and Uses: Section 73.1820 requires that each licensee of an AM, FM or TV broadcast station maintain a station log. Each entry must accurately reflect the station's operation. This log should reflect adjustments to operating parameters for AM stations with directional antennas without an approved sampling system; for all stations the actual time of any observation of extinguishment or improper operation of tower lights; and entry of each test of the Emergency Broadcast System (EBS) for commercial stations. The data is used by FCC staff in field investigations to assure that the licensee is operating in accordance with the technical requirements as specified in the FCC Rules and with the station authorization, and is taking reasonable measures to preclude interference to other stations. It is also used to verify that the EBS is operating properly.
