Description: Ratios of hours at work to hours paid are needed to measure labor input for productivity statistics. The ratios of hours at work to hours paid provided by this survey are used to convert hours paid by employees, which are based on data from the Current Employment Statistic Program, to hours at work. The resulting hours at work measures are then incorporated into the Bureau's labor and multifactor productivity statistics published annually and quarterly. The collection of information on hours at work began in 1982 and must be done annually because of the cyclical sensitivity of productivity measures.
