New York State Dam Limited Partnership; Notice of Availability of Draft Environmental Assessment

June 14, 1996.

A draft environmental assessment (DEA) is available for public review. The DEA was prepared for New York State Dam Limited Partnership (licensee) to provide passage for adult blueback herring at the New York State Dam Hydroelectric Project. In a letter dated April 9, 1993, the U.S. Fish and Wildlife Service (FWS) recommended that the licensee operate its existing fish

bypass to provide downstream fish passage for migrating adult blueback herring in the Mohawk River.

Article 15 of the project license requires the licensee, for the conservation and development of fish resources, operate project facilities as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of Interior, after notice and opportunity for hearing.

In summary, the DEA examines the environmental impacts of four alternatives for providing downstream fish passage for adult blueback herring at the project: (1) continuous flow; (2) summer operation; (3) spill; and (4) no-action. These alternatives are described in detail on pages five and six of the DEA.

The DEA recommends that the licensee operate its fish bypass in accordance with the summer operation alternative. The DEA concludes that implementation of this alternative would not constitute a major federal action significantly affecting the quality of the human environment.

This DEA was written by staff in the Office of Hydropower Licensing (OHL). As such, the DEA is OHL staff's preliminary analysis of FWS's recommendation for downstream passage of adult blueback herring. No final conclusions have been made by the Commission regarding this matter. Any action, pursuant to article 15, will be initiated by the Commission only after notice and opportunity for hearing.

Should you wish to provide comments on the DEA, they should be filed within 60 days from the date of this notice. Comments should be addressed to: Ms. Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. Please include the project number (7481-068) on any comments filed.
