Proposed Projects

1. Ethnographic Study of Tuberculosis Outreach Worker Activities—New—This data collection will generate descriptive data from cases directly involved and responsible for providing outreach to identified TB patients to gain an understanding of outreach activities, how they occur, and their level of effectiveness. Three interview guides have been developed for use with TB outreach workers, their supervisor and a small number of outreach patients. This effort will result in a more comprehensive picture of effective and efficient TB outreach activities. The major product of this effort will be a descriptive analytical report detailing the “lessons learned”.
