*Proposed Project:* Evaluation of Model Programs Targeting Substance Abusing Pregnant and Postpartum Women and their Infants—Revision—Data are collected from clients, comparison group women, and staff on interventions received and maternal and child outcomes as part of an evaluation of model projects serving substance abusing pregnant and postpartum women and their infants. The model projects are funded by the Center for Substance Abuse Prevention, SAMHSA. This evaluation will assist CSAP in accomplishing national health objectives related to maternal and child health, especially those directly related to maternal substance abuse and its potential effects on birth outcomes and child development. In this proposed revision of an ongoing study, the data collection instruments remain unchanged. Sample sizes are somewhat smaller than originally anticipated resulting in a reduced annual burden. The estimated revised burden is shown below.

823	5.48	0.24	1082
