### 40 CFR Part 52

[PA 04-9-4028; FRL-5535-9]

#### Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Disapproval of 15 Percent Reasonable-Further-Progress Plan for the Philadelphia Area

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** EPA is proposing to disapprove the State Implementation Plan (SIP) revision submitted by the Commonwealth of Pennsylvania (for the Philadelphia ozone nonattainment area) to meet the 15 percent reasonable further progress (RFP, or 15% plan), also known as rate-of-progress (ROP) requirements of the Clean Air Act. EPA is proposing disapproval because the 15 percent plan submitted by Pennsylvania for the Philadelphia area assumes credit towards ROP for numerous control strategies which are either not fully adopted, are not creditable towards ROP under the Clean Air Act, or have not been adequately quantified. EPA cannot approve these reductions towards the 15% plan, thus causing a "shortfall" towards Pennsylvania's RFP demonstration. Therefore, the Commonwealth has not demonstrated sufficient reductions of volatile organic compounds (VOC) to meet the RFP requirements of the Clean Air Act. Finally, the 1990 emissions inventory estimates used in the 15% plan as the baseline for reasonable further progress differs substantially from Pennsylvania's separate 1990 base year emission inventory SIP submittal. Without justification of these differences, EPA cannot approve the revised inventory estimates.

**DATES:** Comments on this proposed action must be postmarked by September 9, 1996.

**ADDRESSES:** Written comments may be mailed to Kathleen Henry, Acting Chief, Ozone/Carbon Monoxide, and Mobile Sources Section, Mailcode 3AT21, U.S. Environmental Protection Agency—Region III, 841 Chestnut Building,

#### SUPPLEMENTARY INFORMATION:

##### Background

Section 182(b)(1) of the Clean Air Act (the Act), as amended in 1990, requires ozone nonattainment areas classified as moderate or above to develop plans to reduce VOC emissions by fifteen percent from the 1990 baseline inventory for the area. These "15% plans" were due to be submitted to EPA by November 15, 1993, with the reductions to occur within 6 years of enactment (i.e. November 15, 1996). Furthermore, the Clean Air Act sets limitations on the creditability of certain control measures towards reasonable further progress. Specifically, States cannot take credit for reductions achieved by Federal Motor Vehicle Control Program (FMVCP) measures (e.g. new car emissions standards) promulgated prior to 1990; or for reductions stemming from regulations promulgated prior to 1990 to lower the volatility (i.e., Reid Vapor Pressure) of gasoline. Furthermore, the Act does not allow credit towards RFP for post-1990 corrections to existing motor vehicle inspection and maintenance (I/M) programs or corrections to reasonably available control technology (RACT) rules, since these programs were required to be in-place prior to 1990. Additionally, section 172(c)(9) of the Clean Air Act requires "contingency measures" to be included in the plan revision. These measures are required to
