July 9, 1996.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the

Commission, including whether the information shall have practical utility; (b) the accuracy of the Commissions burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

The FCC is reviewing the following information collection requirements for possible 3-year extension under delegated authority 5 CFR 1320, authority delegated to the Commission by the Office of Management and Budget (OMB).

Number of Respondents: 2.

Estimated Time Per Response: 2 hours.

Total Annual Burden: 4 hours.

Needs and Uses: The reporting requirement contained in Section 80.361 is necessary to require applicants to submit a showing of need to obtain new or additional narrow-band direct-printing (NB-DP) frequencies. Applicants for new or additional NB-DP frequencies are required to show the schedule of service of each currently licensed or proposed series of NB-DP frequencies and to show a need for additional frequencies based on at least a 40% usage of existing NB-DP frequencies. The information is used to determine whether an application for a

NB-DP frequency should be granted. If the collection of this information was not conducted, the FCC would have no information available regarding the use of NB-DP frequencies by public coast stations, and, therefore would be handicapped in determining whether the frequencies were being hoarded and not put into use by public coast stations.
