

the waste codes which have been previously exempted and are listed in the Federal Register notice of June 5, 1995.

CONDITIONS: General conditions of this exemption are found at 40 CFR Part 148. The exemption granted to CWM on August 7, 1990 included a number of specific conditions. Conditions numbered (1), (2), (3), (4), and (9) remain in force. Monitoring under condition 5, which called for construction and operation of a deep monitoring well, will continue through the life of the facility. Conditions numbered (5), (6), (7), and (8) have been satisfied. The results of the work carried out under these conditions confirms that the model used to simulate fluid movement within the injection zone for the next 10,000 years is valid and results of the simulation bound the region of the injection zone within which the waste will be contained.

DATES: This action is effective as of June 24, 1996.

Underground Injection Control Program Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; EMPAK, Inc., (EMPAK)

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on petition reissuance.

SUMMARY: Notice is hereby given that modification of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to EMPAK, for the Class I injection well located at Deer Park, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation

that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by EMPAK, of the specific restricted hazardous waste identified in the exemption modification, into the Class I hazardous waste injection well at the Deer Park, Texas facility specifically identified in the modified exemption, for as long as the basis for granting an approval of this exemption remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued May 8, 1996. The public comment period closed on June 24, 1996. EPA received no comments. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of July 3, 1996.
