DEPARTMENT OF ENERGY

Physical Optics Devices

AGENCY: Office of the General Counsel, Department of Energy.

ACTION: Notice of intent to grant exclusive patent license.

SUMMARY: Notice is hereby given of an intent to grant to Physical Optics Devices, of Santa Fe, New Mexico, an exclusive license to practice the inventions described in U.S. Patent No. 5,029,528, entitled “FIBER OPTIC MOUNTED LASER DRIVEN FLYER PLATES,” and No. 5,046,423, entitled “LASER-DRIVEN FLYER PLATE.” The inventions are owned by the United States of America, as represented by the Department of Energy (DOE).

DATES: Written comments or nonexclusive license applications are to be received at the address listed below no later than September 17, 1996.

SUPPLEMENTARY INFORMATION: 35 U.S.C. 209(c) provides the Department with authority to grant exclusive or partially exclusive licenses in Department-owned inventions, where a determination can be made, among other things, that the desired practical application of the inventions has not been achieved, or is not likely expeditiously to be achieved, under a nonexclusive license. The statute and implementing regulations (37 C.F.R. 404) require that the necessary determinations be made after public notice and opportunity for filing written objections. Physical Optics Devices, of Santa Fe, New Mexico, has applied for an exclusive license to practice the inventions embodied in U.S. Patent No. 5,029,528 and No. 5,046,423, and has a plan for commercialization of the inventions. The inventions consist generally of so-called “flyer plates,” metal foil material accelerated by a focused laser beam, which first converts a layer of foil to a plasma which accelerates a layer of the metal foil toward a target. One of the patents incorporates optical fibers to enhance flexibility of operation.

The proposed license will be exclusive as deemed appropriate, subject to a license and other rights retained by the U.S. Government, and subject to a negotiated royalty and other terms and conditions.

DOE intends to grant the license, upon a final determination in accordance with 35 U.S.C. 209(c), unless within 60 days of this notice the Assistant General Counsel for Technology Transfer and Intellectual Property, Department of Energy, Washington, D.C. 20585 receives in writing any of the following, together with supporting documents: (i) A statement from any person setting forth reasons why it would not be in the best interests of the United States to grant the proposed license; or (ii) An application for a nonexclusive license to the invention, in which applicant states that he already has brought the inventions to practical application or is likely to bring the inventions to practical application expeditiously. The Department will review all timely written responses to this notice, and will grant the license if, after expiration of the 60-day notice period, and after consideration of any written responses to this notice, a determination is made, in accordance with 35 U.S.C. 209(c), that the license grant is in the public interest.

Issued in Washington, D.C., on July 15, 1996.

Agnes P. Dover,
Deputy General Counsel for Technology Transfer and Procurement.
