SUMMARY: In response to a request from the respondent, IPSCO Inc. (IPSCO), the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on oil country tubular goods (OCTG) from Canada. This review covers one manufacturer/exporter, IPSCO, and the period June 1, 1994 through May 31, 1995. We preliminarily determine the dumping margin for IPSCO to be zero percent during the period June 1, 1994, through May 31, 1995. In accordance with section 353.25 of the Department's regulations, we intend to revoke the antidumping duty order with respect to IPSCO because we have reason to believe that IPSCO has sold the merchandise at not less than normal value (NV) for a period of at least three consecutive years and is not likely to sell the subject merchandise at less than NV in the future. Interested parties are invited to comment on these preliminary results. Parties who submit argument in this proceeding are requested to submit with the argument: (1) a statement of the issue; and (2) a brief summary of the argument.

EFFECTIVE DATE: July 19, 1996.

SUPPLEMENTARY INFORMATION:

The Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Rounds Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the current regulations, as amended by the interim regulations published in the Federal Register on May 11, 1995 (60 FR 25130).

Background

The Department published an antidumping duty order on OCTG from Canada on June 16, 1986 (51 FR 21782) and an amended order on August 19, 1986 (51 FR 29579). The Department published a notice of "Opportunity To Request an Administrative Review" of the antidumping duty order for the 1994/1995 reviews period on June 6, 1995 (60 FR 29821). On June 21, 1995, IPSCO requested that the Department conduct an administrative review of the antidumping duty order on OCTG from Canada. We initiated the review on July 14, 1995 (60 FR 36260).

Due to the federal government shutdown and the necessity for verification, the Department extended the time limits for the deadlines for the preliminary and final results of review. See Antidumping Duty Administrative Reviews; Time Limits, 61 FR 9676 (March 11, 1996).

The Department is now conducting this administrative review in accordance with section 751 of the Act.

Intent To Revoke

In its submission of June 21, 1995, IPSCO requested, pursuant to 19 CFR 353.25(b), revocation of the order with respect to its sales of OCTG. In accordance with 19 CFR 353.25(b), IPSCO submitted: (1) a certification that it sold the subject merchandise at not less than normal value (NV) during the relevant review period, and that in the future it will not sell the subject merchandise at less than NV; and (2) a statement that it agrees to the immediate reinstatement of the order, as long as any producer or reseller is subject to the order, if the Department concludes that IPSCO sold the subject merchandise at less than NV subsequent to the revocation. Based on the preliminary results in this review and the final results of the two preceding reviews, IPSCO has demonstrated three consecutive years of sales at not less than NV.

If the final results of this review demonstrate that IPSCO sold the merchandise at not less than NV, and if the Department determines that it is not likely that IPSCO will sell the subject merchandise at less than NV in the future, we intend to revoke the order with respect to merchandise produced and exported by IPSCO.

Scope of the Review

The products covered by this review include shipments of OCTG from Canada. This includes American Petroleum Institute (API) specification OCTG and all other pipe with the following characteristics except entries which the Department determined through its end-use certification procedure were not used in OCTG applications: Length of at least 16 feet; outside diameter of standard sizes published in the API or proprietary specifications for OCTG with tolerances of plus 1/8 inch for diameters less than or equal to 8% inches and plus 1/16 inch for diameters greater than 8% inches, minimum wall thickness as identified for a given outer diameter as published...
