Title: NSPS for Pressure Sensitive Tape and Label Surface Coating (Subpart RR); OMB Control No. 2060-0004; EPA ICR No. 0658.06. This is a request for extension of a currently approved collection.

Abstract: Owners and operators of facilities that manufacture pressure sensitive tape and labels must make the following onetime-only reports: notification of the date of construction or reconstruction; notification of the anticipated and actual dates of initial start-up; notification of any physical change to an existing facility that may increase the regulated pollutant emission rate; notification of initial performance test and the results of the initial performance test. Owners or operators are also required to maintain records of the occurrences and duration of any start-up, shut-down or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports and records are required, in general, of all sources subject to NSPS.

Monitoring requirements specific to these coating operations consist of maintaining a calendar month record of all coatings used and their VOC content, the amount of solvent applied and recovered, and temperature of exhaust gases during incineration.

This collected information is used by the Agency to efficiently monitor industry compliance with NSPS. In the absence of collecting such information, continuous monitoring of compliance with the standards could be ensured only through continuous on-site inspections by regulatory agency personnel, which would be extremely costly.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 3/26/96 (61 FR 13177). No comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 6.3 hours per response.
