The ICRs describe the nature of the information collections and their expected burden and cost; where appropriate, they include the actual data collection instruments.

SUPPLEMENTARY INFORMATION:

Title: Standards of Performance for Hot Mix Asphalt Facilities (OMB Control No. 2060-0083; EPA ICR No. 1127.05). This is a request for extension of a currently approved collection.

Abstract: Owners/operators of hot mix asphalt facilities must notify EPA of construction, modification, startups, shut downs, date and results of initial performance test. The only type of industry costs associated with the information collection activity in the standards are labor costs. In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on September 29, 1995.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 4,611 hours. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners/operators of hot mix asphalt facilities.

Estimated Number of Respondents: 1370.

Frequency of Response: annually.

Estimated Number of Responses: 1370.
