

settlement agreement, where the FAR–NOPR approach would only allow 80% of the contractor's costs to be reimbursed, even if the settlement agreement provides for full reimbursement.

The Department is considering switching to the FAR–NOPR approach and amending existing paragraphs in its clause, rather than creating a new stand-alone paragraph. DOE urges interested members of the public to comment on the two approaches and whether the Department should adopt the FAR approach in its final rulemaking.

SUPPLEMENTARY INFORMATION:

Background

The Service published a proposed rule to list the Barton Springs salamander as an endangered species on February 17, 1994 (59 FR 7968). As set forth in the proposal, the primary threat to this species is contamination of the waters that supply Barton Springs by potential catastrophic events and chronic degradation resulting from urban activities. Also of concern are disturbances to the salamander's above-ground springhead habitats (the waters in Barton Springs, Eliza Pool, and Sunken Garden Springs) and reduced groundwater supplies resulting from increased groundwater withdrawal.

The comment period on the proposed listing originally closed April 18, 1994. It was reopened May 26, 1994 and closed July 1, 1994 (59 FR 27257; May 26, 1994). On March 19, 1995, the Service published a notice extending the deadline for final action on this proposed listing for a period of up to six months and the public comment period was reopened until May 17, 1995 (60 FR 13105). The notice indicated this extension was necessary because, "during the comment periods and subsequent to the close of comment on this proposal, the Service received recommendations and information relevant to a final decision on the listing of the salamander. In order to adequately incorporate all pertinent information in the deliberation leading
