Draft Environmental Impact Report/ Environmental Impact Statement on the Stanislaus River Basin and Calaveras River Water Use Program (Also Known as the American River/ Folsom South Conjunctive Use Optimization Study)

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of cancellation.

SUMMARY: The Bureau of Reclamation (Reclamation) and the California Department of Water Resources (DWR) are canceling plans to continue work under the National Environmental Policy Act and the California Environmental Quality Act on the Environmental Impact Report/ Environmental Impact Statement (EIR/ EIS) for the Stanislaus River Basin and Calaveras River Water Use Program. DWR terminated participation in this joint EIR/EIS since the Program would not likely result in any increased yield to the State Water Project. The notice of intent was published in 55 FR 15291, Apr. 23, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. David Lewis, Mid-Pacific Region, Bureau of Reclamation, Attention: MP-700, 2800 Cottage Way, Sacramento, CA 95825-1898; telephone: (916) 979-2336.

SUPPLEMENTARY INFORMATION: The Program was a joint study by Reclamation and DWR to formulate a plan for increasing and optimizing water supply, and for the long-term use of water supply for the area between the Stanislaus and Calaveras Rivers. In terminating their participation, DWR indicated the Program would not likely result in any increased yield to the State Water Project. Interim water supplies once available for use outside the study area appear to now be needed to meet water quality, fish, and wildlife requirements as required by both the Central Valley Project Improvement Act and the December 1994 Bay-Delta Accord. Owing to the ongoing Reclamation activity entitled New Melones Water Management Study, Short-term, it is advantageous for Reclamation to write a transition report documenting study activities. The New Melones Water Management Study, Short-Term, is developing an interim plan of operation and suitable method of allocation to manage available water supplies in the Stanislaus River Basin until either the California State Water Resources Control Board completes the water rights phase of the Bay-Delta hearings or until a long-term operation plan for New Melones Reservoir is negotiated among the stakeholders. The New Melones Water Management

Study, Long-Term, is the second phase and is intended to develop a long-term operation strategy for New Melones Reservoir. This study will negotiate a consensus among stakeholders concerning New Melones Reservoir long-term operation. If it is determined that upon completion of both the New Melones Water Management Study, Short-Term and Long-Term, there are still unmet demands, a new planning study will be developed to address these needs.

Roger Patterson,
Regional Director.
