Grand River Dam Authority; Notice of Availability of Draft Environmental Assessment

August 9, 1996.

A draft environmental assessment (DEA) is available for public review. The DEA was prepared for an application filed by Grand River Dam Authority (GRDA) that requests an amendment to the operating rule curve for impoundment elevations required under license article 401. In summary, GRDA proposes to modify the licensed rule curve by: (1) Delaying the spring rise from elevation 742 feet PD by two weeks, from April 16 to May 1, to better accommodate runoff from spring flows; (2) setting the rule curve's maximum water surface elevation at 744 feet PD instead of 745 feet PD to provide better flood management; and (3) delaying the drawdown from elevation 744 feet PD by about three weeks, from July 6 to August 1, and the drawdown from elevation 743 feet PD by about two weeks, from August 1 to August 16, to better coincide with the recreational boating season. The Pensacola Hydroelectric Project is located on the grand River, near the towns of Langley and Disney, in Craig, Delaware, Mayes, and Ottawa Counties, Oklahoma.

The DEA finds that GRDA's proposed amendment is not a major federal action significantly affecting the quality of the human environment. The DEA was written by staff in the Office of Hydropower Licensing, Federal Energy Regulatory Commission. Copies of the DEA can be obtained by calling the Commission's Public Reference Room at (202) 208-1371.

Comments on the DEA must be filed with the Commission within 30 days from the date of this notice. Comments should be addressed to: Ms. Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First

Street, N.E., Washington, D.C. 20426. Please include the project number (1494-123) on any comments filed.
