

the phenomenon is lacking. This CPS supplement would provide objective information about "contingent work."

II. Current Actions

The contingent work supplement provides information on the number and characteristics of workers in contingent jobs, that is, jobs which are structured to last only a limited period of time. The survey also provides information about workers in several alternative employment arrangements, including those working as independent contractors and on-call workers, as well as those working through temporary help agencies or contract companies. The supplement was first conducted in February 1995. While the initial collection provided a wealth of information on contingent and alternative employment arrangements, being a new survey, it could not provide any information on the trend in such employment. A key purpose of the February 1997 collection is to provide a second point of comparison. This will enable the BLS and other researchers to examine whether contingent and alternative employment arrangements are becoming more common.
