Name: Citizens Advisory Committee on Public Health Service Activities and Research at DOE Sites: Fernald Health Effects Subcommittee.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Background

Under a Memorandum of Understanding (MOU) signed in December 1990 with DOE, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, an MOU was signed in October 1990 and renewed in November 1992 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure

and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose

This subcommittee is charged with providing advice and recommendations to the Director, CDC, and the Administrator, ATSDR, regarding community, American Indian Tribes, and labor concerns pertaining to CDC's and ATSDR's public health activities and research at respective DOE sites. The purpose of this meeting is to provide a forum for community, and labor interaction and serve as a vehicle for community concern to be expressed as advice and recommendations to CDC and ATSDR.

Matters To Be Discussed

Agenda items include: presentations from the National Center for Environmental Health (NCEH) on current activities; and from the National Institute for Occupational Safety and Health and ATSDR on the progress of current studies.

Agenda items are subject to change as priorities dictate.

ACTION: Notice.

To reflect its reliance on the "Seafood List," FDA also is announcing the availability of a new

CPG. These actions are being taken to ensure that FDA's CPG's accurately reflect current agency views on compliance policy.

SUPPLEMENTARY INFORMATION: FDA is revoking three of its CPG's that address the labeling of seafood because they have been superseded by more comprehensive guidance provided by the "Seafood List." The following three compliance policy guides are being revoked: (1) CPG Sec. 540.100 "Capelin; Prohibited From Being Labeled as Smelt" (CPG 7108.22); (2) CPG Sec. 540.300 "Crabmeat—Product Name" (CPG 7108.04); and (3) CPG Sec. 540.350 "Common or Usual Names for Crustaceans" (CPG 7108.23). The above CPG's are superseded by FDA's "Seafood List." The "Seafood List" includes more accurate and comprehensive guidance than that contained in these CPG's.

Developed in recognition of the need for a single source of recommended market names for an expanding variety of seafood, the "Seafood List" is a revision of the "FDA Guide to Acceptable Market Names for Food Fish Sold in Interstate Commerce" (sometimes referred to as the "Fish
