Finding of No Significant Impact for Potomac Headwaters Land Treatment Watershed Project Hardy, Hampshire, Mineral, Grant, and Pendleton Counties, West Virginia

#### *Introduction*

The Potomac Headwaters Land Treatment Watershed Project is a federally assisted action authorized for planning under Public Law 78-534, the Flood Control Act. An environmental assessment was undertaken in conjunction with the development of the watershed plan. This assessment was conducted in consultation with local, State, and Federal agencies as well as with interested organizations and individuals. Data developed during the assessment are available for public review at the following location: U.S. Department of Agriculture, Natural Resources Conservation Service, 75 High Street, Room 301, Morgantown, West Virginia 26505.

#### *Recommended Action*

Proposed is the installation of animal waste storage systems, dead bird composters, livestock confinement improvements, nutrient management plans, and riparian buffer zones for the purpose of reducing nutrient and bacterial pollution in the Potomac River headwaters.

#### *Effects of the Recommended Action*

Improvements in animal waste management will result in decreased runoff of nutrients and bacteria to streams, improving the water quality of the project area. Proper storage and application of manure and poultry litter will not only improve water quality, but will also improve the farmers efficiencies and make the product available for market. Installation of dead bird composters will enable more growers to manage this poultry waste product in an environmentally sound and economical means. Development of nutrient management plans will assure proper field application rates of animal waste. Installation of riparian buffer zones will reduce nutrient and bacteria runoff to streams and surface waters.

Risks of water-borne illnesses will be reduced, and the water pollution threat to fishing, boating, swimming, and tourism in the area will be lessened.

The proposed action will have little or no effect on wetlands. No adverse effects to threatened/endangered species are anticipated.

Consultation has been initiated with the State Historic Preservation Office. Should significant cultural resources be identified during implementation, they will be avoided or otherwise preserved in place to the fullest practical extent. If significant cultural resources cannot be avoided or preserved, pertinent information will be recovered before construction. If there is a significant cultural resource discovery during construction, appropriate notice will be made by NRCS to the State Historic Preservation Officer and the National Park Service. Consultation and coordination have been and will continue to be used to ensure the provisions of Section 106 of Public Law 89-665 have been met and to include provisions of Public Law 89-523, as amended by Public Law 93-291. NRCS will take action as prescribed in NRCS GM 420, Part 401, to protect or recover any significant cultural resources discovered during construction.

#### *Alternatives*

The planned action is the most practical means of reducing nutrient and bacterial pollution of streams. Because no significant adverse environmental impacts will result from installation of the measures, no other alternatives, other than the no project one, were considered.

#### *Consultation—Public Participation*

Formal agency consultation began with the initiation of the notification of the State Single Point of Contact for Federal Assistance in September 1995. Scoping meetings were held in September, October, and December 1995 and interdisciplinary efforts were used in all cases. A public meeting was held on May 2, 1996 to present the Draft Plan-Environmental Assessment to the Public and to receive comments and questions.

Specific consultation was conducted with the State Historic Preservation Officer concerning cultural resources in the watershed, and with the U.S. Fish and Wildlife Service regarding threatened/endangered species. The U.S. Geological Survey, through a cooperative agreement, conducted water sampling and testing to establish baseline water quality values.

The plan-environmental assessment was transmitted to all participating and interested agencies, groups, and individuals for review and comment on March 29, 1996.

Agency consultation and public participation to date have shown no unresolved conflicts with the implementation of the selected plan.

#### *Conclusion*

The Environmental Assessment summarized above indicates that this Federal action will not cause significant local, regional, or national impacts on the environment. Therefore, based on the above findings, I have determined that an environmental impact statement for the Potomac Headwaters Land Treatment Watershed Project is not required.

Dated: August 19, 1996.
