NUCLEAR REGULATORY COMMISSION

[Docket No. 72-2 (50-280/281)]

Notice of Issuance of Amendment to Materials License SNM-2501, Virginia Electric and Power Company, Surry Independent Spent Fuel Storage Installation

The U.S. Nuclear Regulatory Commission (the Commission) has

issued Amendment 8 to Materials License No. SNM-2501 held by Virginia Electric and Power Company (VA Power) for the receipt, possession, transfer, and storage of spent fuel at the Surry ISFSI, located in Surry County, Virginia. The amendment is effective as of the date of issuance.

By application dated October 16, 1995, VA Power requested to amend its ISFSI license to (1) Revise references to the physical security plan, and (2) permanently exempt it from the submittal date specified in 10 CFR 72.44(d)(3) for the required annual radioactive effluent release report. The Commission has chosen not to grant the exemption. However, the license has been revised to delete the requirement of submitting a second, semi-annual radioactive effluent release report that is not required by 10 CFR Part 72.

This amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

In accordance with 10 CFR 72.46(b)(2), a determination has been made that the amendment does not present a genuine issue as to whether public health and safety will be significantly affected. Therefore, the publication of a notice of proposed action and an opportunity for hearing or a notice of hearing is not warranted. Notice is hereby given of the right of interested persons to request a hearing on whether the action should be rescinded or modified.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that, pursuant to 10 CFR 51.22(c) (10) and (12), an environmental assessment need not be prepared in connection with issuance of the amendment.

Documents related to this action are available for public inspection at the Commission's Public Document Room located at the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room at the Swem Library, the College of William and Mary, Williamsburg, VA 23185.

Dated at Rockville, Maryland, this 20th day of August 1996.

For the Nuclear Regulatory Commission.
William D. Travers,
Director, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards.
