

recommend practices in the management and selection of systems. The earliest of these guidelines is nearly twenty years old, and the most recent guideline is ten years old. Information technology has changed considerably since they were issued during the era of centralized computing on mainframe computers. Today, Federal organizations use a wide variety of hardware, software, distributed systems, and networks, and there are many sources of information on all aspects of managing these resources.

NIST believes that it would not be cost effective to revise these standards and guidelines, thereby duplicating information that is broadly available from a variety of sources. Withdrawal means that the FIPS standards and guidelines will no longer be part of a subscription service that is provided by the National Technical Information Service, and that NIST will no longer be able to revise or answer questions about the FIPS.

Current voluntary industry standards should be used by agencies in their procurement actions where appropriate, in accordance with OMB Circular A-119, Federal Participation and Use of Voluntary Industry Standards. NIST will continue to provide information about good information technology practices through publications, electronic bulletin boards and Internet pages.

Prior to the submission of this proposed withdrawal to the Secretary of Commerce for review and approval, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

Interested parties may obtain copies of these standards and guidelines from the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161, telephone (703) 487-4650.

DATE: Comments on this proposed withdrawal of these FIPS must be received on or before December 2, 1996.

ADDRESSES: Written comments concerning the withdrawal should be sent to: Director, Computer Systems Laboratory, ATTN: Proposed Withdrawal of 32 FIPS, Technology Building, Room A-231, National Institute of Standards and Technology, Gaithersburg, MD 20899.
