The Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 et seq.) gives the Secretary of the Interior responsibility for oil and gas leasing on approximately 600 million acres of public lands and national forests, and private lands where minerals have been reserved by the Federal Government. The Federal Onshore Oil and Gas Leasing Reform Act of 1987 was passed by Congress to require that all public lands that are available for oil and gas leasing be offered first by competitive oral bidding. The Department of the Interior Appropriations Act of 1981 (43 U.S.C. 6508) provides for the competitive leasing of the lands in the National Petroleum Reserve-Alaska (NPR-A). The Geothermal Steam Act of 1970 (30 U.S.C. 1001-1025) authorizes the Secretary of the Interior to issue leases for geothermal development. The lands available for exploration and leasing include public, withdrawn, reserved, and acquired lands administered by the Bureau of Land Management (BLM). The National Environmental Policy Act (NEPA) of 1969 established a national policy to protect the environment.

The regulations within 43 CFR Group 3100 outline procedures for obtaining a lease to explore for, develop, and produce oil and gas resources located on Federal lands. The regulations within 43 CFR Group 3200 provide for the issuance of geothermal leases and the exploration, development and utilization of Federally-owned geothermal resources. The BLM needs the information requested on the two forms to process bids for oil and gas and geothermal lands and to complete environmental reviews required by the NEPA.

The information will be used to determine the highest qualified bonus bid submitted for a competitive oil and gas or geothermal resources parcel on
