SUMMARY: Notice is hereby given that NMFS has issued modifications to two permits that authorize takes of Endangered Species Act-listed species for the purpose of scientific research/enhancement, subject to certain conditions set forth therein, to the Washington Department of Fish and Wildlife (WDFW) at Olympia, WA and the Columbia River Inter-Tribal Fish Commission at Portland, OR (CRITFC). **ADDRESSES:** The applications and related documents are available for review in the following offices, by appointment:

Environmental and Technical Services Division, 525 NE Oregon Street, Suite 500, Portland, OR 97232-4169 (503-230-5400).

SUPPLEMENTARY INFORMATION: The modifications to permits were issued under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS

Notice was published on July 19, 1996 (61 FR 37722) that an application had been filed by WDFW (P507D) for modification 5 to scientific research/enhancement permit 848. Modification 5 to permit 848 was issued to WDFW on September 6, 1996. Permit 848 authorizes WDFW annual takes of adult and juvenile, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) associated with a supplementation program at the Tucannon River Fish Hatchery. For Modification 5, WDFW is authorized an increase in the number of hatchery smolts to be released annually in the upper watershed of the Tucannon River. Also for modification 5, WDFW is authorized to retain all of the adult, ESA-listed, natural-origin salmon that return to the hatchery adult trap each year for broodstock if the total annual adult returns to the trap is less than 105 fish. If the total annual adult returns to the trap is greater than or equal to 105 fish, WDFW is authorized to retain up to 70 percent of the adult, ESA-listed natural-origin salmon that return to the hatchery adult trap each year for broodstock and to release the remaining percentage of ESA-listed adult salmon above the hatchery trap for natural spawning. Modification 5 to permit 848 is valid for the duration of the permit. Permit 848 expires on March 31, 1998.

Notice was published on July 3, 1996 (61 FR 34800) that an application had been filed by CRITFC (P513) for modification 7 to scientific research permit 825. Permit 825 authorizes an annual take of adult and juvenile, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) and juvenile, endangered, Snake River sockeye salmon (*Oncorhynchus nerka*) associated with several scientific research studies. For modification 7, CRITFC is authorized an annual take of juvenile, threatened, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*) associated with a study designed to monitor the extent of dissolved nitrogen gas supersaturation effects on outmigrating juvenile anadromous fish in the Snake and Columbia Rivers in the Pacific Northwest. Modification 7 is valid for the duration of the permit. Permit 825 expires on December 31, 1997.

Issuance of the permit modifications, as required by the ESA, was based on a finding that such actions: (1) Were requested in good faith, (2) will not operate to the disadvantage of the ESA-
