

Analysis of the blood samples will be conducted primarily by CDC's Nutritional Biochemistry Laboratory. A brief questionnaire will be administered to the child's parent or caretaker to assess dietary intake, and check for the presence of other factors that may influence test results. The questionnaire and the blood test will be administered during the regular WIC certification visit; no additional clinic visits will be required. Participation in the study is optional. If feasible, the study will also include 4 sites serving one year old children not participating in WIC, but located in close proximity to 4 of the WIC sites, to enable a broader assessment of the magnitude, distribution and etiology of the problem of anemia within the affected communities, and the role of the WIC Program. The number of children is expected to average 233 per clinic, for a total sample size of about 2,800, including non-WIC children. The project is currently under review by CDC's Institutional Review Board (IRB) in accordance with federal requirements for the protection of human subjects of research (45 CFR Part 46; 7 CFR Part 1c).

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 15 minutes for each parent or caretaker of a child participating in the study.

Respondents: Respondents are the parents or caretakers of WIC and non-WIC children participating in the study.

Estimated Number of Respondents: 2000 children participating in WIC, and 800 children not participating in WIC.

Estimated Number of Responses per Respondent: One.

Estimated Total Annual Burden on Respondents: 700 hours. Copies of this information collection can be obtained from Janet Schiller, Office of Analysis and Evaluation, Food and Consumer Service, U.S. Department of Agriculture,

3101 Park Center Drive, Alexandria, VA 22302.

William E. Ludwig,
Administrator, Food and Consumer Service.

Dated: September 30, 1996.
