

With respect to burden for the states for the incidence rate component, this will vary depending on the number of vehicle records requested. Also, the number of states contacted may be fewer than 50, depending on the geographic distribution of the sample and the distribution of vehicle matches obtained

from use of the national (commercial) title files. It is estimated that the number of records per state will average 150. It is assumed that all states contacted will be able to provide a computer listing of the requested information. The average time to respond to the request is estimated at 3 hours per state. The

burden estimate for responding to the state survey questionnaire (component 2) is 3 hours per state. The proposed method of surveying the states is via mail questionnaire, supplemented by telephone contacts.

Collection No.	Number of respondents	Frequency of response	Total annual responses	Burden hours per response	Annual burden hours	Cost to respondents
(1)	50 dealers/distrs	1	50	3	150	\$2,250
(1)	40 states	1	40	3	120	2,400
(2)	50 states	1	50	3	150	3,000
