## DEPARTMENT OF ENERGY

### Office of Arms Control and Nonproliferation Policy; Proposed Subsequent Arrangement

**AGENCY:** Department of Energy.

**ACTION:** Subsequent arrangement.

**SUMMARY:** Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation in the Peaceful Uses of Nuclear Energy between the United States of America and the European Atomic Energy Community (EURATOM) and the Agreement for Cooperation between the Government of the United States of America and the Government of Japan concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above-mentioned agreements involves approval of the following: RTD/JA(EU)-79, for the transfer of 0.043 grams of uranium containing 0.042 grams of the isotope U-233 (98 percent enrichment); and 0.0022 grams of plutonium-242 (99.9 percent enrichment); and 0.010 grams of uranium containing 0.0033 grams of the isotope U-233 (33 percent enrichment) and 0.0033 grams of the isotope U-235 (33 percent enrichment) from EURATOM to Japan for use as reference material for mass spectrometer calibration.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days

after the date of publication of this notice.

Dated: September 24, 1996.

For the Department of Energy.

Edward T. Fei,

*Deputy Director, International Policy and Analysis Division, Office of Arms Control and Nonproliferation.*

[Docket No. EA-124]

### Application to Export Electric Energy; Public Service Company of New Mexico

**AGENCY:** Office of Fossil Energy, DOE.

**AGENCY:** Notice of application.

**SUMMARY:** Public Service Company of New Mexico (PNM), a regulated public utility, has submitted an application to export electric energy to Mexico pursuant to section 202(e) of the Federal Power Act.

**DATES:** Comments, protests or requests to intervene must be submitted on or before October 14, 1996.

**ADDRESSES:** Comments, protests or requests to intervene should be addressed as follows: Office of Coal & Electricity (FE-52), Office of Fuels Programs, Office of Fossil Energy, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585 (FAX 202-287-5736).

**FOR FURTHER INFORMATION CONTACT:** Ellen Russell (Program Office) 202-586-9624 or Michael Skinker (Program Attorney) 202-586-6667.

**SUPPLEMENTARY INFORMATION:** Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. § 824a(e)).

On September 24, 1996, PNM filed an application with the Office of Fossil Energy (FE) of the Department of Energy (DOE) for authorization to export electric energy to the Comision Federal de Electricidad (CFE), the Mexican national electric utility, pursuant to section 202(e) of the FPA. Specifically, PNM has proposed to engage in open-ended transactions to transmit and exchange wholesale electric energy under terms and contracts to be negotiated in the future.

PNM asserts that a series of State regulatory actions have left the utility with 170 megawatts (MW) of generating capacity that could be dedicated for the sale in the wholesale market. PNM further asserts that it will schedule all power consistent with the reliability criteria, standards, and guides of the North American Electric Reliability Council and the Western Systems Coordinating Council.

The electric energy PNM proposes to sell to CFE would be delivered to Mexico using El Paso Electric Company's (EPE) 115-kilovolt (kV) line at Ascarate, Texas, and EPE's 115-kV line at Diablo, New Mexico. The construction and operation of these international transmission lines was
