Proposed Information Collection Activity; Comment Request

Proposed Projects

Title: Comprehensive Child Development Program Cohort 1 Longitudinal Follow up Study.

OMB No.: New Request.

Description: In 1988, the Congress enacted the Comprehensive Child Development Act (Pub. L. 100-297) that authorized the Administration for Children and Families to fund up to 25 Comprehensive Child Development Programs (CCDP). In 1989 and 1990, twenty-four CCDP programs located throughout the country were funded to demonstrate the long-term effectiveness of a comprehensive response to the multiple problems facing low income families including providing intensive, comprehensive, integrated, and continuous supportive services to (1) enhance the physical, emotional, and intellectual development of infants and young children, and (2) provide necessary support to their parents and other family members.

The Head Start Reauthorization Act of 1994 established priority for longitudinal studies that examine the developmental progress of children and their families during and following participation in a Head Start program, including the examination of factors

that contribute to or detract from such progress. In response to this priority, the Administration on Children, Youth and Families (ACYF) ACYF awarded a contract through a competitive procurement to Civitan International Research Center at the University of Alabama at Birmingham (CIRC) with a subcontract to CSR, Incorporated. The evaluation will be carried out from October 1, 1995, through September 30, 2000. Data collection activities that are the subject of this Federal Register notice are intended for the second and fourth phases of the CCDP Cohort 1 Longitudinal Followup Study.

Respondents: Focus children, parents of focus children, teachers of focus children, and key actors in the service delivery systems of the focus children's communities.

The sample for the child and family assessments consists of focus children and their families in eight of the original 24 CCDP sites. A total of 1,780 focus children and their families were randomly assigned to treatment (CCDP
