Members will be expected to make a contribution to the consortium's efforts in the form of personnel, and/or funds. This is not a grant program.

DATES: Interested parties should contact NIST to confirm their interest at the address, telephone number or FAX number shown below.

ADDRESSES: Technology Building, Room B360, National Institute of Standards and Technology, Gaithersburg, MD 20899.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: NIST and Sandia National Laboratories have successfully fabricated and tested prototypes of a new class of reference materials to support CD-metrology below 0.25 m. This work has the long-term goal of the commercial availability of certified physical standards traceable to NIST. As a result of the multiple requests for sample prototypes for evaluative purposes that they have received, NIST and Sandia management have proposed a Consortium to maximize the benefits of exchanging measurement results made independently by a diverse group of participants, each of whom will be loaned a pre-measured prototype sample for evaluation. The purpose of the above meeting is to describe the chip layout and reference-feature construction, to review the CD-measurement results already extracted from the different chips by NIST and Sandia, and to explain the CRADA (Cooperative Research and Development Agreement) rules which will apply to the Consortium. The distribution of samples will begin as soon as signed CRADA documents are returned to NIST. Each participating organization will be requested to make an illustrated presentation of its CD-measurement results at a closed meeting to be held in conjunction with SEMICON/West 97.

Organizations not members of SEMATECH may be asked to contribute a nominal fee in order to participate.
