

and commercial sectors, and quotas, bag limits, size limits, and other measures needed to attain TAC. If an ABC range and TAC are not specified, the Council must use the more lengthy process of a full plan amendment to implement any changes to management measures.

The SSC will also review an options paper for development of an amendment to the FMP for Reef Fish Resources of the Gulf of Mexico, regarding development of a red snapper license limitation system. The issues include basic initial allocation and bycatch provisions, licenses issued to persons or vessels, historical captains, transferability of licenses, number of licenses that can be owned by one entity, transferability of landing records related to initial eligibility for licenses, fishing season dates, duration of license limitation system, allocation of a portion of the commercial quota for bycatch during closed season, and appeals board for license eligibility. The options paper also contains alternatives regarding the harvest of reef fish in traps other than fish traps.

DATES: This meeting will be held on December 11, 1996, from 8:00 a.m. to 4:00 p.m.

ADDRESSES: This meeting will be held at the Doubletree Guest Suites Hotel, 4400 West Cypress Street, Tampa, FL 33607; telephone: 813-873-8675.

West Kennedy Boulevard, Suite 331, Tampa, FL 33609.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The purpose of the meeting will be to review the Reef Fish Stock Assessment Panel (RFSAP) and Socioeconomic Panel (SEP) reports regarding a new stock assessment for vermilion snapper, an update of the 1995 stock assessment for red snapper, and discussions regarding biological information and landings data for amberjack species. The AP will review any recommendations of the RFSAP and SEP regarding allowable biological catch (ABC) ranges for these species, and they may develop recommendations of ABC or total allowable catch (TAC) for submission to the Council. The AP may also recommend future data gathering and research needs.

Under the Reef Fish Fishery Management Plan's framework procedure for setting TAC, when an ABC range has been specified, the Council may implement through a regulatory amendment a TAC, which is then allocated between the recreational and commercial sectors, and quotas, bag limits, size limits, and other measures needed to attain TAC. If an ABC range and TAC are not specified, the Council must use the more lengthy process of a full plan amendment to implement any changes to management measures.

The AP is comprised of fishermen and other user groups who advise the Council on fishery issues.
