Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of Research Integrity (ORI) has made a final finding of scientific misconduct in the following case:

Yi Li, University of Illinois, Urbana-Champaign: Based upon an investigation conducted by the University of Illinois, Urbana-Champaign, information obtained by the Office of Research Integrity (ORI) during its oversight review, and Mr. Li's own admission, ORI found that Yi Li, while a candidate for a Ph.D. degree in the Neuroscience Program at the University of Illinois, Urbana-Champaign, engaged in scientific misconduct by fabricating an experimental study and results for research represented in an abstract prepared for submission for presentation at a national meeting. The research was supported by a grant from the National Institute on Aging (NIA), National Institutes of Health (NIH).

The fabricated abstract and results addressed an electrophysiological study of the behavioral correlates for long-term potentiation in the motor cortex of the central nervous system of freely moving rats.

Mr. Li has accepted the ORI finding and has entered into a Voluntary Exclusion Agreement with ORI in which he has voluntarily agreed, for the three (3) year period beginning November 18, 1996:

(1) To exclude himself from serving in any advisory capacity to the Public Health Service (PHS), including but not limited to service on any PHS advisory committee, board, and/or peer review committee, or as a consultant; and

(2) That any institution that submits an application for PHS support for a research project on which the respondent's participation is proposed or which uses the respondent in any capacity on PHS supported research must concurrently submit a plan for supervision of his duties. The supervisory plan must be designed to ensure the scientific integrity of the respondent's research contribution. The institution must submit a copy of the supervisory plan to ORI.
