Under Method Two, the proposed allocations for new Native American customers were calculated based upon the same estimated demand figures as in Method One above. The proposed allocations were derived by dividing the Native American tribes' share of the resource pool among the tribes in the same proportion as each tribe's percent of total estimated demand.

The proposed allocations to new Native American customers set forth in the table above are based on the P-SMBP-ED marketable resource available at this time. If the P-SMBP-ED marketable resource is adjusted in the future, the proposed allocations will be adjusted accordingly.

After all public comments have been thoroughly considered, Western will prepare and publish the Final Post-2000 Resource Pool Allocation in the Federal Register.

Issued at Golden, Colorado, November 21, 1996.

Administrator.
