

needs for which they are designed, it is essential that they be evaluated and revised periodically. This information collection will be used to evaluate the items on the 1989 revisions of the standard certificates and to determine if there is other information that should be

included on the standards that is needed for relevant public health research. Respondents will include individuals and organizations who are involved in the completion of vital records or who utilize vital statistics data and have an interest in the content

of the standard certificates. The information collected will be used by a group of consultants to determine what changes may be needed in the 1989 standard certificates. The total cost to respondents is estimated at \$90,000.

Respondents	Number of respondents	Number of respondents/responses	Average burden/response (in hrs.)	Total burden (in hrs.)
Live Birth Questionnaire .....	2000	1	0.5	1000
Fetal Death Questionnaire .....	2000	1	0.5	1000
Death Questionnaire .....	2000	1	0.5	1000
<b>Total .....</b>				<b>3000</b>

**[30DAY-24]**

**Agency Forms Undergoing Paperwork Reduction Act Review**

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Office on (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New

Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

The following requests have been submitted for review since the last publication date on November 27, 1996.

**Proposed Project**

**1. Chronic Fatigue Syndrome Surveillance and Related Studies—Prevalence and Incidence of Fatiguing Illness in Sedgewick County, Kansas—New**—In 1994, OMB approved the information collection “Epidemiology of Fatiguing Illness in Wichita: A Population-Based Study” under OMB Number (0920-0336). Data from this cross-sectional, point prevalence, random-digit-dial survey of prolonged fatiguing illness in San Francisco, CA concluded that CFS continues to exist and that prolonged fatigue occurs in

over five percent of the population in San Francisco.

The proposed study replicates the San Francisco study using identical methodology and data collection instruments. Beginning with a random-digit-dial telephone survey to identify fatigued individuals, followed by a case-control study where surveillance interview instruments will be used to obtain comparative data on fatigued individuals and matched health (non-fatigued) controls. Study objectives remain to refine estimates of CFS in Wichita, identify similarities and differences among cases and controls, and to evaluate the merits of a physician-based surveillance conducted by the Wichita department of health. The total annual burden is 7646. Send comments to CDC Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503.

Respondents	Number of respondents	Number of responses/respondent	Avg. burden/response (in hrs.)
Household Screener .....	26,000	1	0.083
*Cross-sectional interview .....	6,864	1	.....
*Follow-up interview .....	5,148	1	.....
Adolescent Questionnaire .....	5,532	1	0.027

\*These respondents are a subset of the 26,000 respondents to household.

Dated: December 4, 1996.

Wilma G. Johnson,

*Acting Associate Director for Policy Planning and Evaluation, Centers for Disease Control and Prevention (CDC).*

**Administration for Children and Families**

**Proposed Information Collection Activity; Comment Request**

**Proposed Projects**

**Title:** Child Support Enforcement Technical Assistance Survey and Best Practices Report.

**OMB No.:** New Collection.

**Description:** The new welfare reform law requires the Federal Office of Child Support Enforcement (OCSE) to provide technical assistance to States and localities. This information collection is designed to help OCSE learn what type of technical assistance is needed, and what child support practices have been successful. We plan to collect the first type of information through voluntary needs assessment and technical
