DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Animal Trapping Within the National Wildlife Refuge System

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Fish and Wildlife Service (Service) is seeking information regarding the use of animal traps within the National Wildlife Refuge System. Interested parties that wish to provide information on any aspect of this subject should send the information to the address listed below no later than February 15, 1997. All information received will be forwarded to the House and Senate Appropriations Committees

by March 1, 1997 as required by the Omnibus Fiscal Year 1997 Appropriations Bill.

DATES: For written comments to be considered, they must be received by February 15, 1997.

ADDRESSES: U.S. Fish and Wildlife Service, Division of Refuges, Attention: Trapping Project, 4401 N. Fairfax Drive, Room 670, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Ken McDermond, Refuge Program Specialist, 703/358-2422; 703/358-1826 (fax);

kenneth_mcdermond@mail.fws.gov
(email).

SUPPLEMENTARY INFORMATION: The conference report accompanying the Fiscal Year 1997 Appropriations Act, Public Law 104-208, 110 STAT. 3009 contained the following language:

“While there is no specific prohibition on the use of steel jaw leghold traps, the Service should establish a task force to study the use of animal traps in the National Wildlife Refuge System. The task force should consider the humaneness of various trapping methods, as well as the cost, the impact on the protection of endangered species, the impact on Fish and Wildlife Service facilities, and other relevant issues. The task force should include interested outside parties and report its findings to the House and Senate Committees on Appropriations by March 1, 1997.”

The Committee’s instructions to the Service provided that the Service “should establish a task force to study the use of animal traps” and the “task force should include interested outside parties and report its findings to the House and Senate Committees on Appropriations by March 1, 1997.” These instructions presented a difficult legal challenge. After consultation with the Service’s representatives in the Solicitor’s Office, it was clear that given the time available to meet these instructions that it would be virtually impossible to achieve a balanced but limited representation of interests on the task force and prepare a report that represented the task force’s findings while being consistent with legally required procedures. The Solicitor’s Office suggested, however, that a general solicitation from all interested outside parties, encouraging a broadly-based task force approach that would not serve to exclude interested participants, and the transmittal of all information received thereby to the Committees without editorial change or policy alteration would be consistent with the general intent of the Committee’s instructions and achievable within the existing procedural laws by March 1, 1997. The Service has, accordingly, adopted this suggestion and requests all interested parties to submit information on the use of traps in the National Wildlife Refuge System, in particular those issues identified in the conference report.

Dated: December 11, 1996.

John G. Rogers,
Acting Director.

Geological Survey

Federal Geographic Data Committee (FGDC); Public Review of Soil Geographic Data Standard

ACTION: Notice; Request for comments.

SUMMARY: The FGDC is sponsoring a public review of the draft “FGDC Soil Geographic Data Standard” to be considered for adoption as an FGDC standard. If adopted, the standard must be followed by all Federal agencies for data collected directly or indirectly (through grants, partnerships, or contracts).

In its assigned leadership role for developing the National Spatial Data Infrastructure (NSDI), the FGDC recognizes that the standards must also meet the needs and recognize the views of State and local governments, academia, industry, and the public. The purpose of this notice is to solicit such views. The FGDC invites the community to review, test, and evaluate the proposed data contest standard. Comments are encouraged about the content, completeness, and usability of the proposed standard.

The FGDC anticipates that the proposed standard, after updating or revision, will be adopted as a Federal Geographic Data Committee standard. The standard may be forwarded to other standard organizations for adoption if interest warrants such actions.

DATES: Comments must be received on or before April 1, 1997.

CONTACT AND ADDRESSES: Requests for written copies of the “FGDC Soil Geographic Data Standard” should be sent by mail to: Soils Standards Review, FGDC Secretariat (attn: Jennifer Fox), U.S. Geological Survey, 590 National Center, 12201 Sunrise Valley Drive, Reston, Virginia, 20192; telephone 703-648-5514; facsimile 703-648-5755; or Internet “gdc@usgs.gov”. The proposed standard is also available for viewing on the Internet on the Soil Data Subcommittee Home Page; the URL is: <http://www.nhq.nrcs.usda.gov/SDS/hmpage.htm>. The standard may be downloaded from the FGDC Home Page at the following URL: www.fgdc.gov (select Public Documents) or directly from the FGDC anonymous ftp site by using the address: www.fgdc.gov/pub/standards.

Reviewer comments should be sent to the FGDC Secretariat at the above address. Please send one hardcopy version of the comments and a soft copy version, preferably on a 3.5x3.5 diskette in WordPerfect 5.0 format.

SUPPLEMENTARY INFORMATION: The overall objective of the Soil Geographic Data Standard is to standardize the names, definitions, ranges of values, and other characteristics of soil survey map attribute data developed by the National Cooperative Soil Survey (NCSS). The NCSS is the body composed of the various federal, state, and local units of government who work cooperatively to develop the soil survey of all lands in the United States.

The soil attribute data associated with soil maps include the physical and chemical properties of the various soils being described, interpretative information, the arrangement of these soils into the soil map units identified
