### Notice of Floodplain Involvement for Proposed Upgrade and Modification of the Pantex Waste Water Treatment Facility

**AGENCY:** Department of Energy (DOE); Amarillo Area Office.

**ACTION:** Notice of floodplain involvement.

**SUMMARY:** DOE proposes to upgrade the existing Pantex Plant waste water treatment facility (WWTF). The existing WWTF is located in a floodplain and discharges effluent, by permit, to a wetland located on the Pantex Plant in Carson County, 17 miles northeast of Amarillo, Texas. In accordance with 10 CFR part 1022, DOE will prepare a floodplain assessment and perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain.

**DATES:** Comments are due to the address below no later than January 6, 1997.

**ADDRESSES:** Comments concerning this Notice should be addressed to: Floodplain and Wetlands Comments, Tom Walton, Public Affairs Officer, Public Affairs Office, U.S. Department of Energy, Amarillo Area Office, P. O. Box 30030, Amarillo, Texas 79120, (806) 477-3120 or Fax (806) 477-3185.

#### FOR FURTHER INFORMATION ON GENERAL DOE FLOODPLAIN/WETLANDS

**ENVIRONMENTAL REVIEW REQUIREMENTS, CONTACT:** Carol M. Borgstrom, Director, Office of NEPA Policy and Assistance, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586-4600 or (800) 472-2756.

**SUPPLEMENTARY INFORMATION:** The existing WWTF is an aerated lagoon and an anaerated lagoon, providing treatment of effluent to meet or exceed required permit levels. The proposed

project is intended to provide additional pollutant and contaminant removal from Pantex Plant waste water. Pantex waste water is and will continue to be composed of both sanitary and industrial waste water. Treated effluent from the present facility is redirected to Playa 1, the receiving water body, as authorized by the National Pollutant Discharge Elimination System Permit No. TX0107107 and the Texas Natural Resource Conservation Commission Waste Water Discharge Permit No. 02296. The project would include work at the existing treatment plant site, located in a floodplain. Diking would be included in the proposed action to prevent floodwaters from reaching the proposed facility, should sufficient water accumulate in the Playa 1 floodplain to reach the 100-year flood level.

In accordance with DOE regulations for compliance with floodplain environmental review requirements (10 CFR part 1022), DOE will prepare a floodplain assessment for this proposed action. The assessment will be included in the environmental assessment (EA) being prepared for the proposed project in accordance with requirements of the National Environmental Policy Act. Based on analysis in the EA, DOE will either prepare a Finding of No Significant Impact and proceed with the action, or prepare an Environmental Impact Statement if the EA reveals potential for significant environmental impact. In the preparation of this EA, DOE will assess the potential impacts to the involved floodplain and publish a Statement of Finding regarding the proposed project.

Issued in Amarillo, Texas on December 11, 1996.

Vicki C. Battley,

*Program Office Official, Amarillo Area Office NCO.*
