SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before February 28, 1997.

CONTACT: Requests for additional information of the information collection proposal can be obtained by calling or writing Linda Engelmeier, Acting DOC Forms Clearance Officer, (202) 482–3272, U.S. Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information of copies of the information collection instrument(s) and instructions should be directed to William Bostic, Bureau of the Census, Room 2641, Building 3, Washington, D.C. 20233–6100 and 301-457–2672 or E-mail at William.G.Bostic.cjr@info.Census.Gov.

SUPPLEMENTARY INFORMATION:
I. Abstract

The Census Bureau is the preeminent collector of timely, relevant and quality data about the people and the economy of the United States. Economic data are the Census Bureau's primary program commitment during non-decennial census years. The economic census, conducted under authority of Title 13 history, is the primary source of facts about the structure and functioning of the Nation's economy and features unique industry and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business, and the general public.

The 1997 Economic Census will cover virtually every sector of the U.S. economy. The Census Bureau will implement the new North American Industry Classification System (NAICS) in the 1997 Economic Census. The implementation of the NAICS as a replacement for the 1987 Standard Industrial Classification (SIC) system will require contacting businesses to collect classification information to update the 1997 Economic Census mailing lists.

II. Method of Collection

The Census Bureau will select establishments to receive this survey from the Census Bureau's SSEL. The Census Bureau will mail the NC–9926 to single-unit manufacturing and mining establishments to obtain needed four-digit industry codes and subindustry detail for small establishments in selected four-digit industries in the apparel area, Major Groups 22 and 23. In addition, this form will be mailed to small manufacturing and mining establishments which could not be assigned a classification code when matched against the Bureau of Labor Statistics classification system. The NC–9926 will contain a list of 6-digit codes and descriptions. Respondents are to select the activity which best describes their business by checking the box next to the activity listed or describe their principal business activity if no box can be checked.

III. Data

The 1997 Economic Census will cover virtually every sector of the U.S. economy. The Census Bureau will implement the new North American Industry Classification System (NAICS) in the 1997 Economic Census. The implementation of the NAICS as a replacement for the 1987 Standard Industrial Classification (SIC) system will require contacting businesses to collect classification information to update the 1997 Economic Census mailing lists.

Accurate and reliable industry and geographic codes are critical to the Bureau of Census statistical programs. New businesses are assigned industry classification by the Social Security Administration (SSA). However, many of these businesses in manufacturing and mining cannot be assigned a detailed industry code because insufficient information is provided on Internal Revenue Service (IRS) Form S5–4. In addition, many of these businesses when matched against the Bureau of Labor Statistics (BLS) classification system cannot be assigned a detailed classification code.
IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they will also become a matter of public record.

Dated: December 19, 1996.

Linda Engelmeier,
Acting Departmental Forms Clearance Officer, Office of Management and Organization.

Circular Welded Non-Alloy Steel Pipe and Tube From Mexico: Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to requests from two respondents, the Department of Commerce ("the Department") is conducting an administrative review of the antidumping duty order on circular welded non-alloy steel pipe and tube from Mexico on November 2, 1992 (57 FR 49453). The Department published a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order for the 1994/95 review period on November 1, 1995 (60 FR 55541). On November 29, 1995, respondent Hylsa S.A. de C.V. ("Hylsa") requested that the Department conduct an administrative review of the antidumping duty order on circular welded non-alloy steel pipe and tube from Mexico. On November 30, 1995, respondent Tuberia Nacional S.A. de C.V. ("TUNA") requested that the Department conduct an administrative review of this order. We initiated this review on December 8, 1995. See 60 FR 44414 (September 15, 1995).

Under Section 751(a)(3)(A) of the Act, the Department may extend the deadline for completion of administrative reviews if it determines that it is not practicable to complete the review within the statutory time limit of 365 days. On June 19, 1996, the Department extended the time limits for preliminary and final results in this case. See Extension of Time Limit for Antidumping Duty Administrative Reviews, 61 FR 40603 (August 5, 1996).

The Department is conducting this administrative review in accordance with section 751 of the Act.

Scope of the Review

The review of "circular welded non-alloy steel pipe and tube" covers products of circular cross-section, not more than 406.4 millimeters (16 inches) in outside diameter, regardless of wall thickness, surface finish (black, galvanized, or painted), or end finish (plain end, bevelled end, threaded, or threaded and coupled). Those pipes and tubes are generally known as standard pipe, though they may also be called structural or mechanical tubing in certain applications. Standard pipes and tubes are intended for the low pressure conveyance of water, steam, natural gas, air and other liquids and gases in plumbing and heating systems, air conditioning units, automatic sprinkler systems, and other related uses. Standard pipe may also be used for load-bearing and mechanical applications, such as for fence tubing, and for protection of electrical wiring, such as conduit shells.

The scope is not limited to standard pipe and fence tubing, or those types of mechanical and structural pipe that are used in standard pipe applications. All carbon steel pipes and tubes within the physical description outlined above are included within the scope of this review, except line pipe, oil country tubular goods, boiler tubing, cold-drawn or cold-rolled mechanical tubing, pipe and tube hollows for redraws, finished scaffolding, and finished rigid conduit. In accordance with the Final Negative Determination of Scope Inquiry (56 FR 11608, March 21, 1996), pipe certified to the API 5L line pipe specification, or pipe certified to both the API 5L line pipe specifications and the less-stringent ASTM A–53 standard pipe specifications, which fall within the physical parameters as outlined above, and entered as line pipe of a kind used for oil and gas pipelines, are outside of the scope of the antidumping duty order.

Imports of these products are currently classifiable under the following Harmonized Tariff Schedule (HTS) subheadings: 7306.30.00, 7306.30.50, 7306.30.50.25, 7306.30.50.32, 7306.30.50.40, 7306.30.50.55, 7306.30.50.85, and 7306.30.50.90. These HTS item numbers are provided for convenience and customs purposes. The written description remains dispositive.

The POR is November 1, 1994 through October 31, 1995. This review covers...
